OPD: registration to prescription

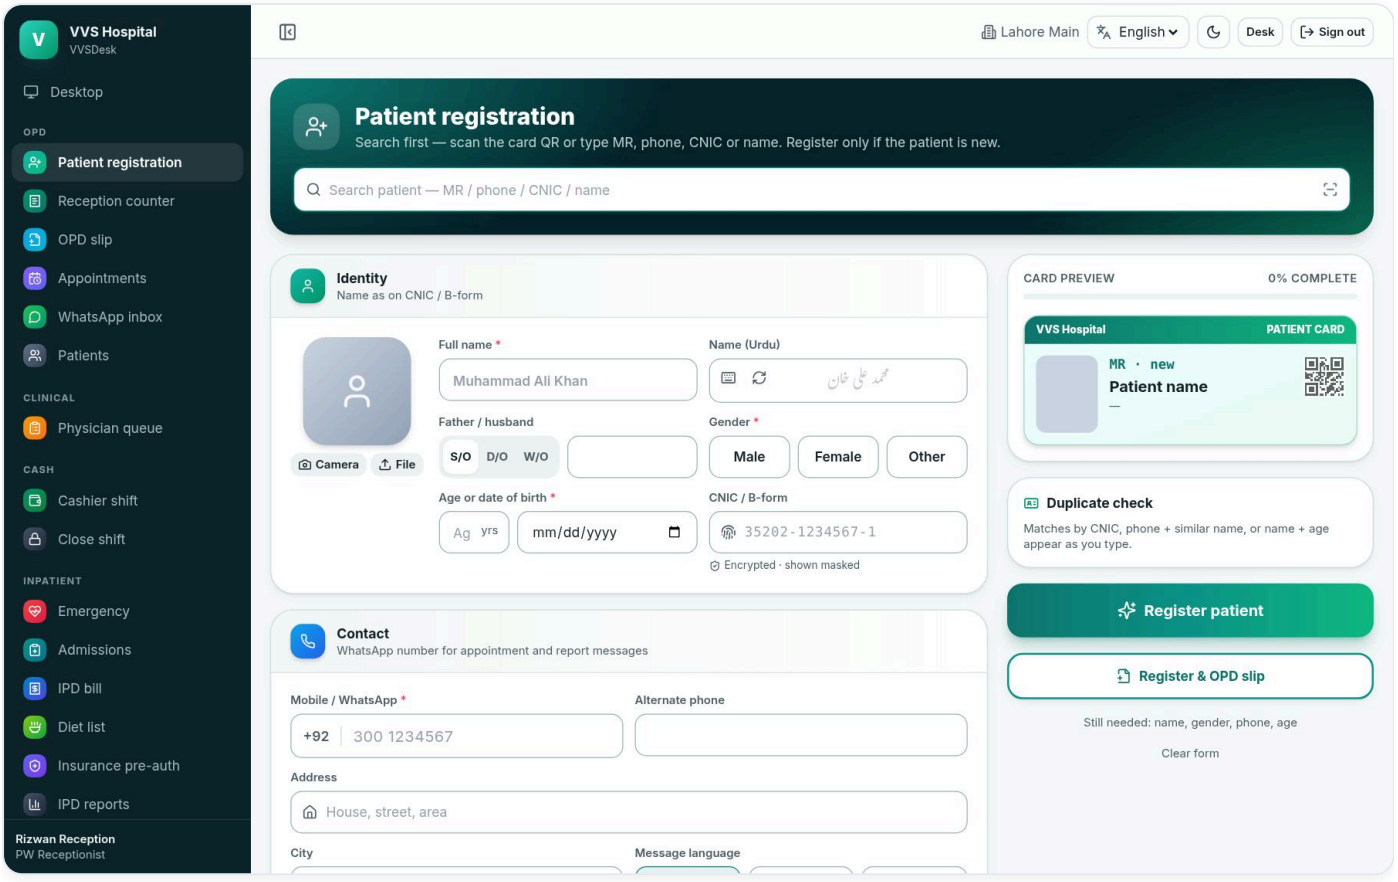

The outpatient flow: register, OPD slip and token, nurse vitals, the doctor's queue and the prescription.

1. Register
2. OPD slip
3. Vitals
4. Queue
5. Prescription

For: Reception, nurses, doctors · 12 November 2026 · Open the app at /hms and follow along; each screen shown here is the live app.

1 Patient registration

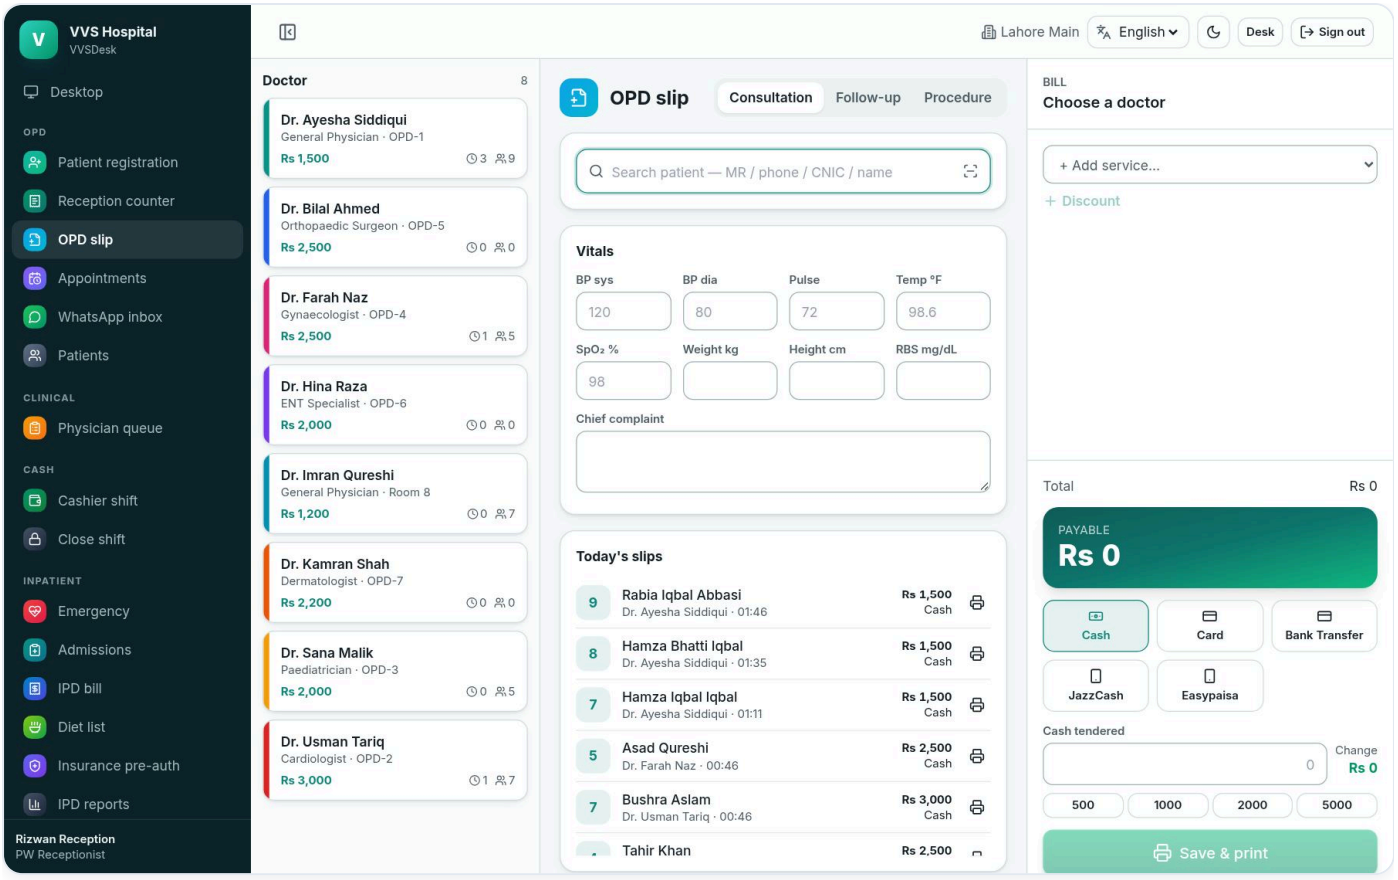

1. Search by MR, mobile, CNIC, name or scan the card. Register only if not found.
2. Name (Urdu fills itself), gender, age or date of birth, mobile, guardian and city.
3. **Register & OPD slip** — or **Patient card** to print the QR card.

Patient registration

2 OPD slip and token

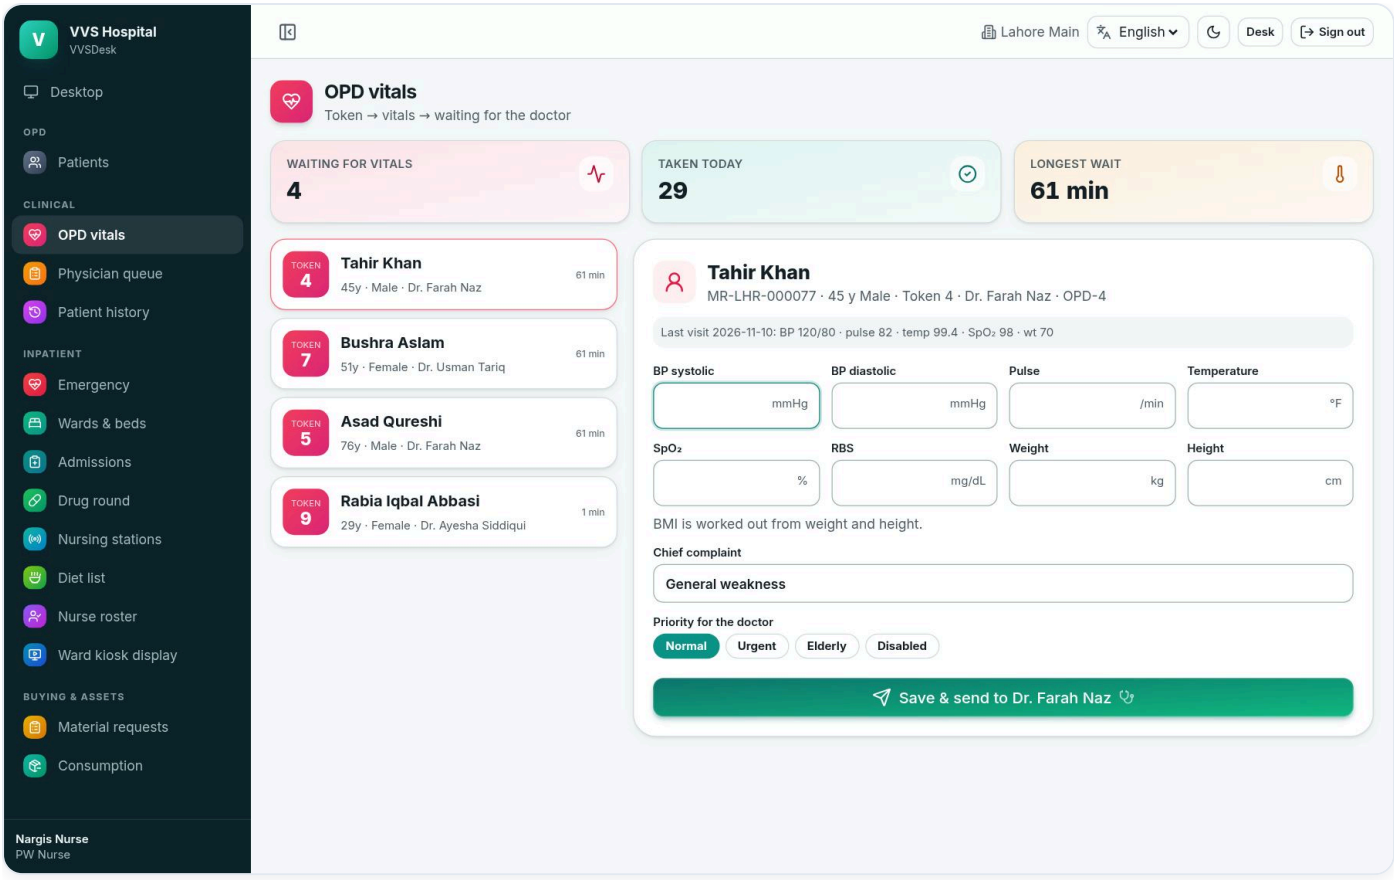

1. Pick the doctor; the fee comes from the fee schedule (follow-up and welfare rates apply).
2. **Save & print**: receipt and token. The token goes to the nurse first.

OPD slip

3 Nurse vitals

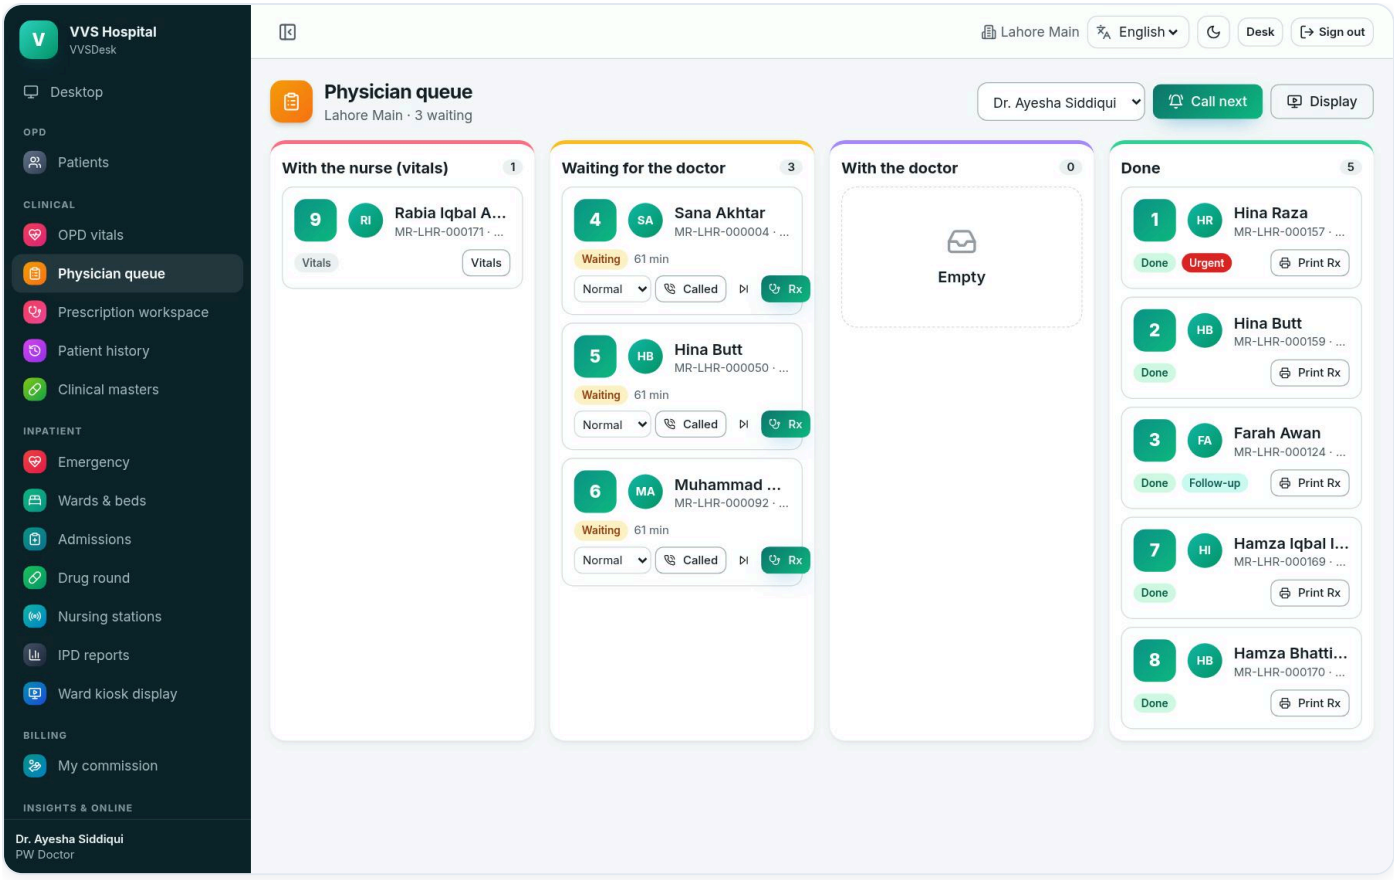

1. **OPD vitals**: urgent and elderly first, last readings shown.
2. Enter vitals, complaint and priority → **Save & send to the doctor**.

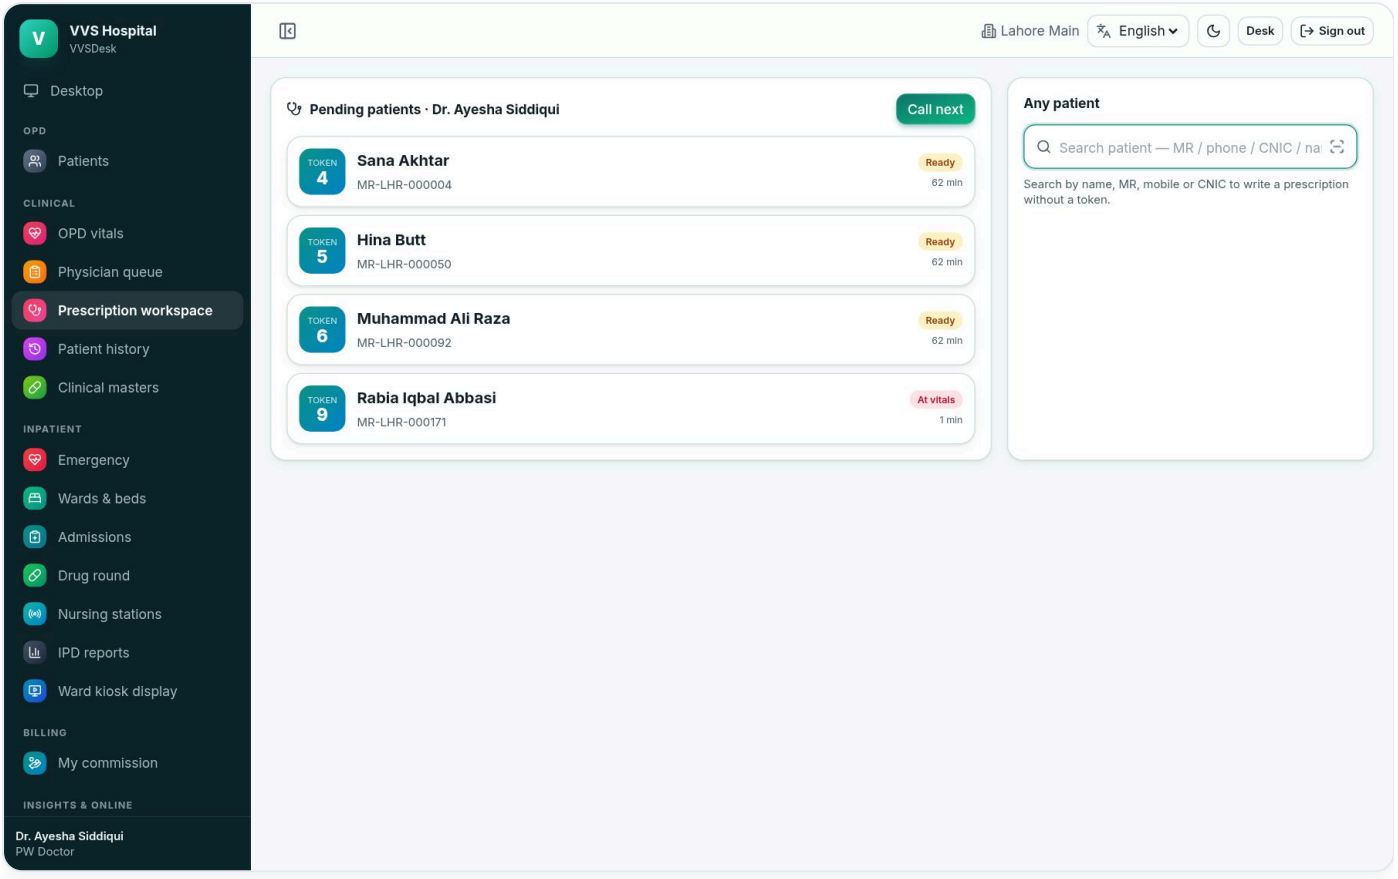

OPD vitals

4 Queue and prescription

1. **Physician queue**: with the nurse · waiting · with the doctor · done.
2. **Prescription workspace**: medicines (quantity from dose × frequency × days), diagnosis chips or ICD-10, lab tests, advice and follow-up.
3. **Sign & print** — reprint any time from **Patient history**.
