VVS HOSPITAL · HOSPITAL ERP · GUIDE

The full patient journey

One patient through the whole hospital — online booking, reception, nurse, doctor, lab, admission and discharge — and who does what at each desk.

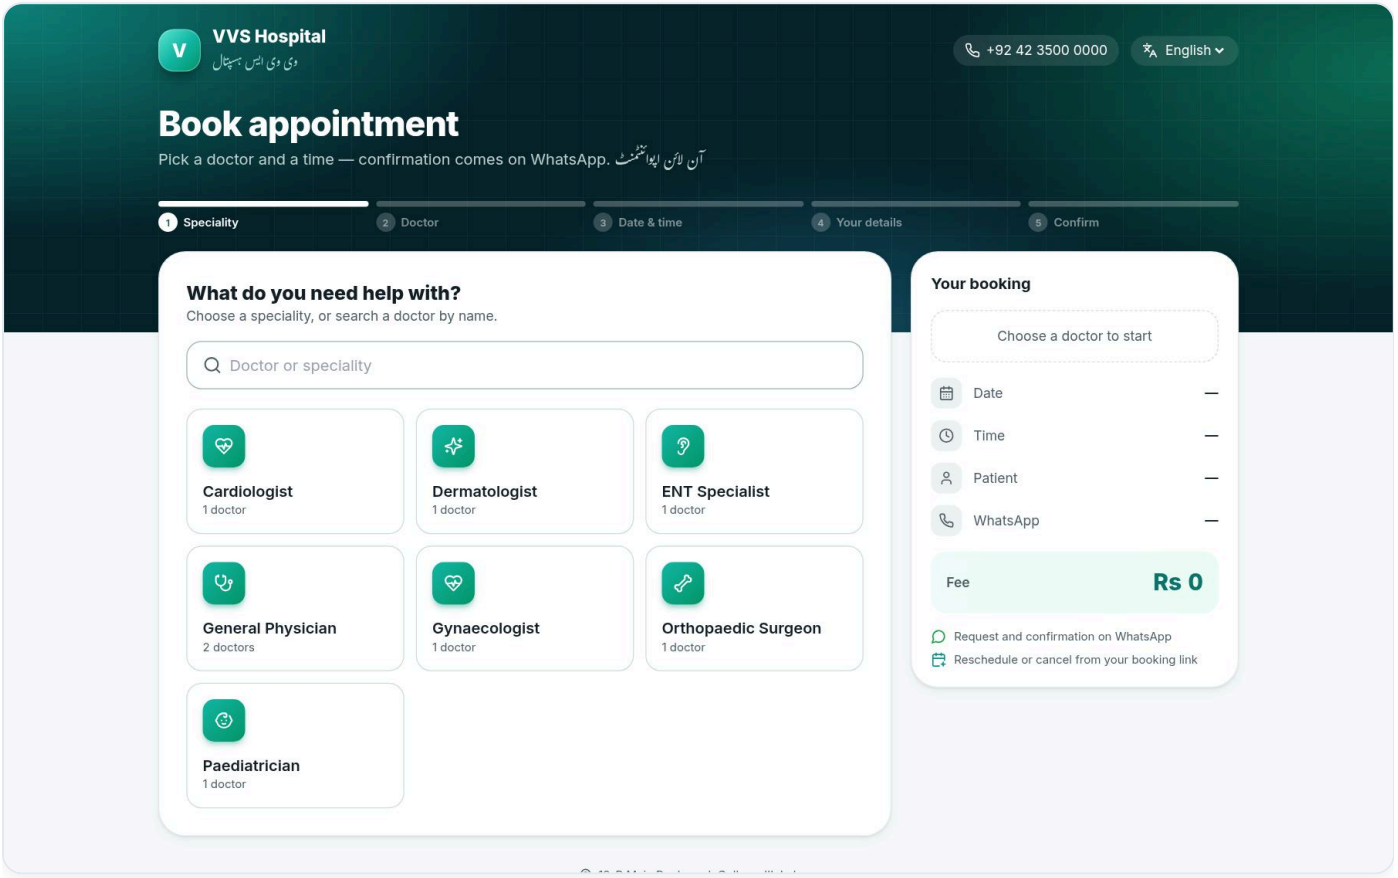

1. Online appointment
2. Reception
3. Nurse
4. Doctor
5. Lab
6. Admission
7. Ward care
8. Discharge

For: Everyone · 12 November 2026 · Open the app at /hms and follow along; each screen shown here is the live app.

1 Online appointment

The patient books on the website (no account needed): doctor → day and time → mobile and details → pay at the clinic or online.

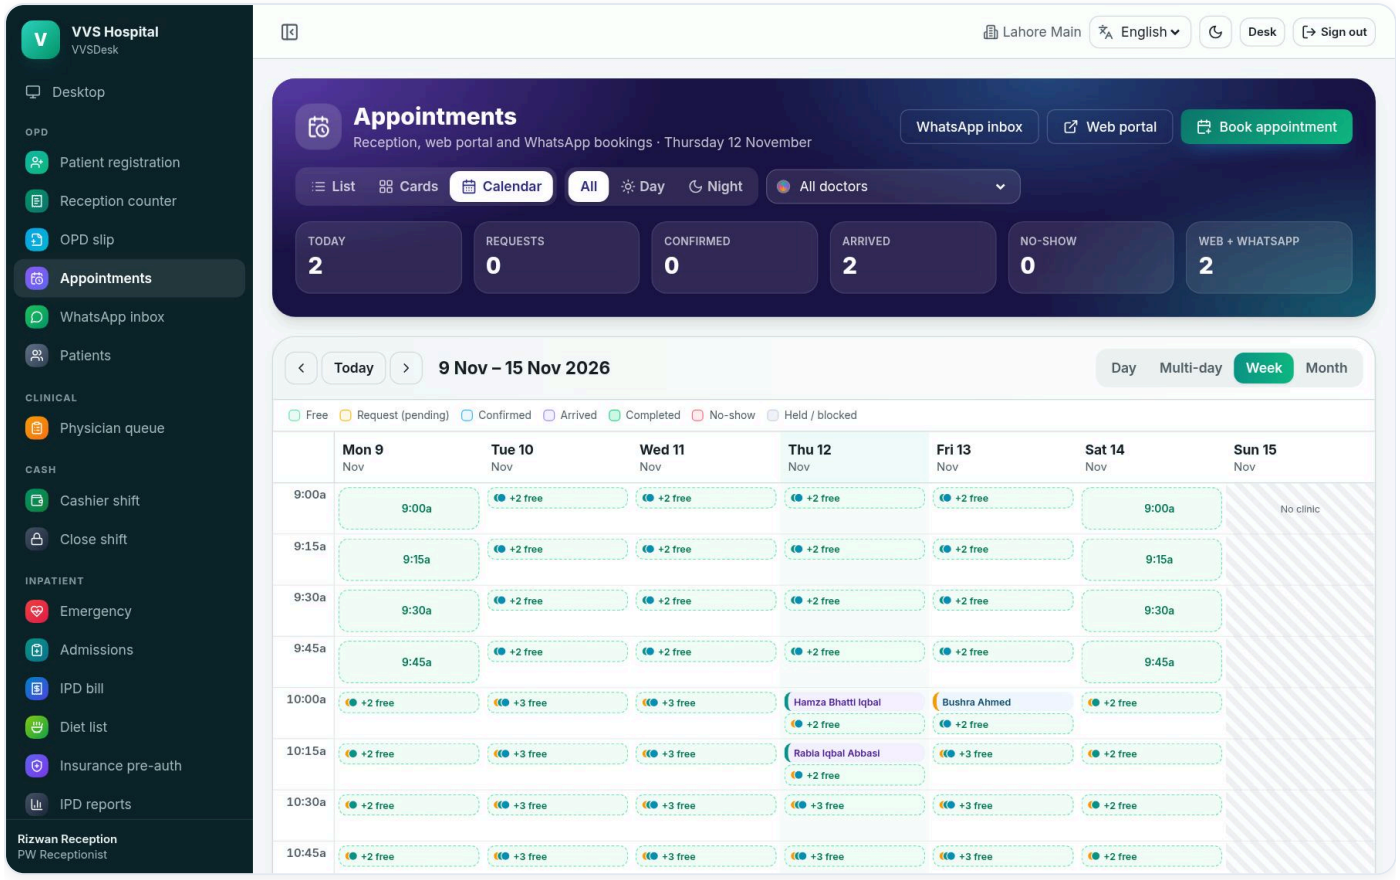

1. The time is held for 10 minutes while booking.
2. A new mobile number books directly; a registered number is confirmed with a code on WhatsApp.
3. The patient gets a booking number; reception confirms it.

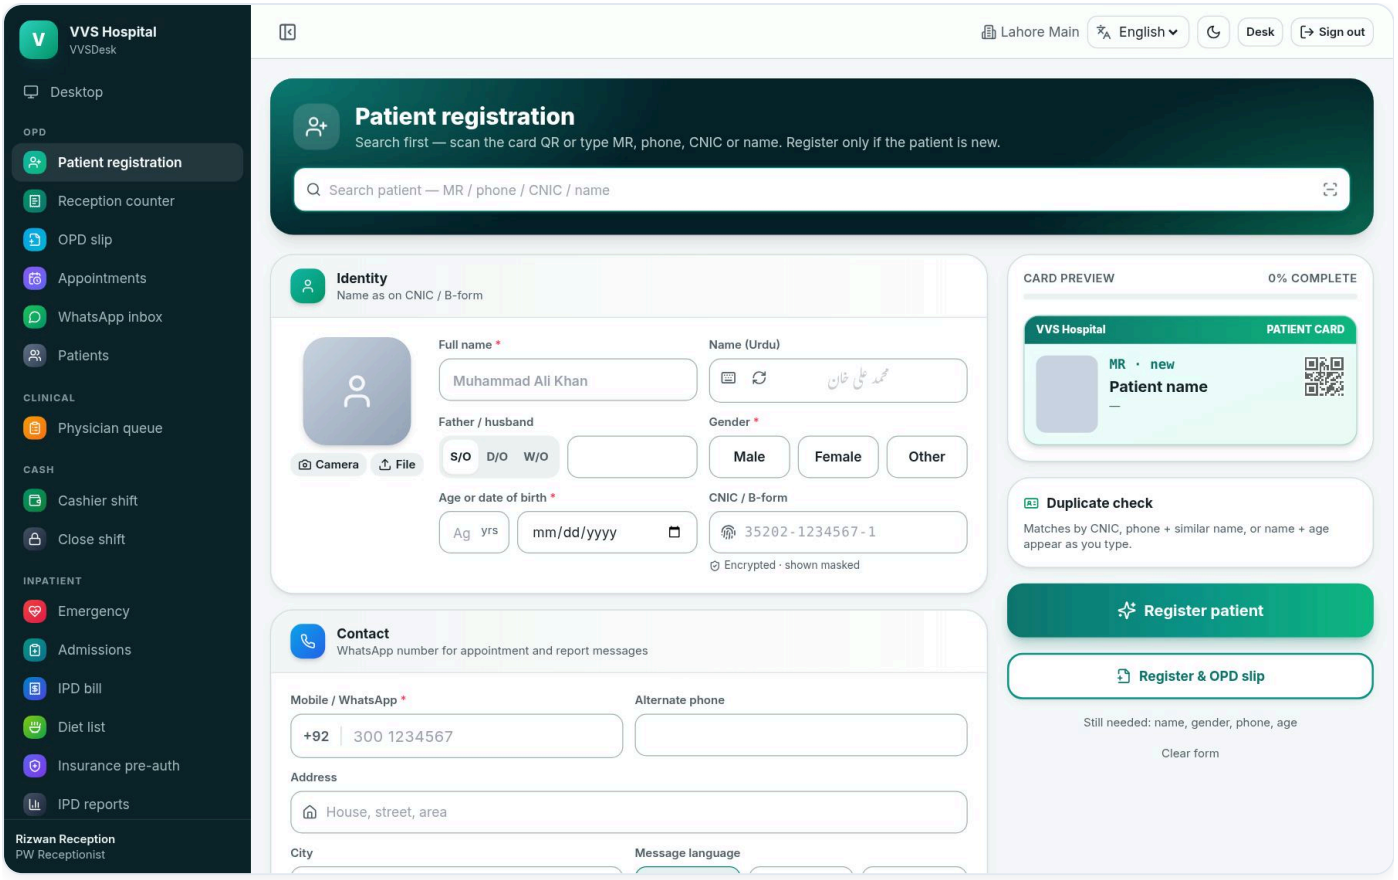

The public booking page

2 Reception: confirm, register, OPD slip

1. **Appointments** → **Confirm** the web booking; the patient gets the confirmation.
2. When the patient arrives, **Arrived** → **Patient registration** (search first) → **Register & OPD slip**.
3. **OPD slip**: choose the doctor, **Save & print** — fee receipt and token.

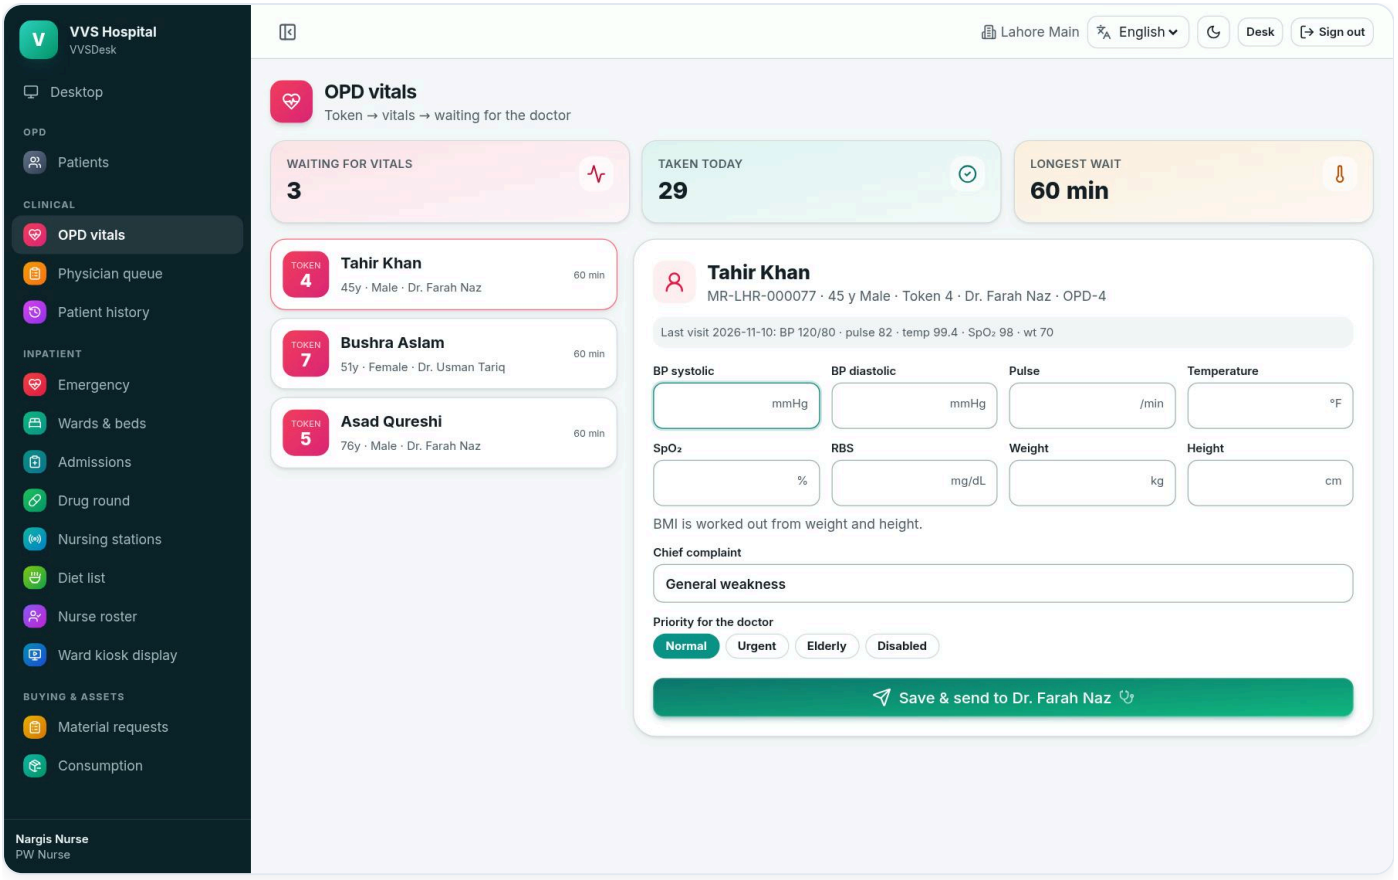

Appointments — counter, website and WhatsApp bookings

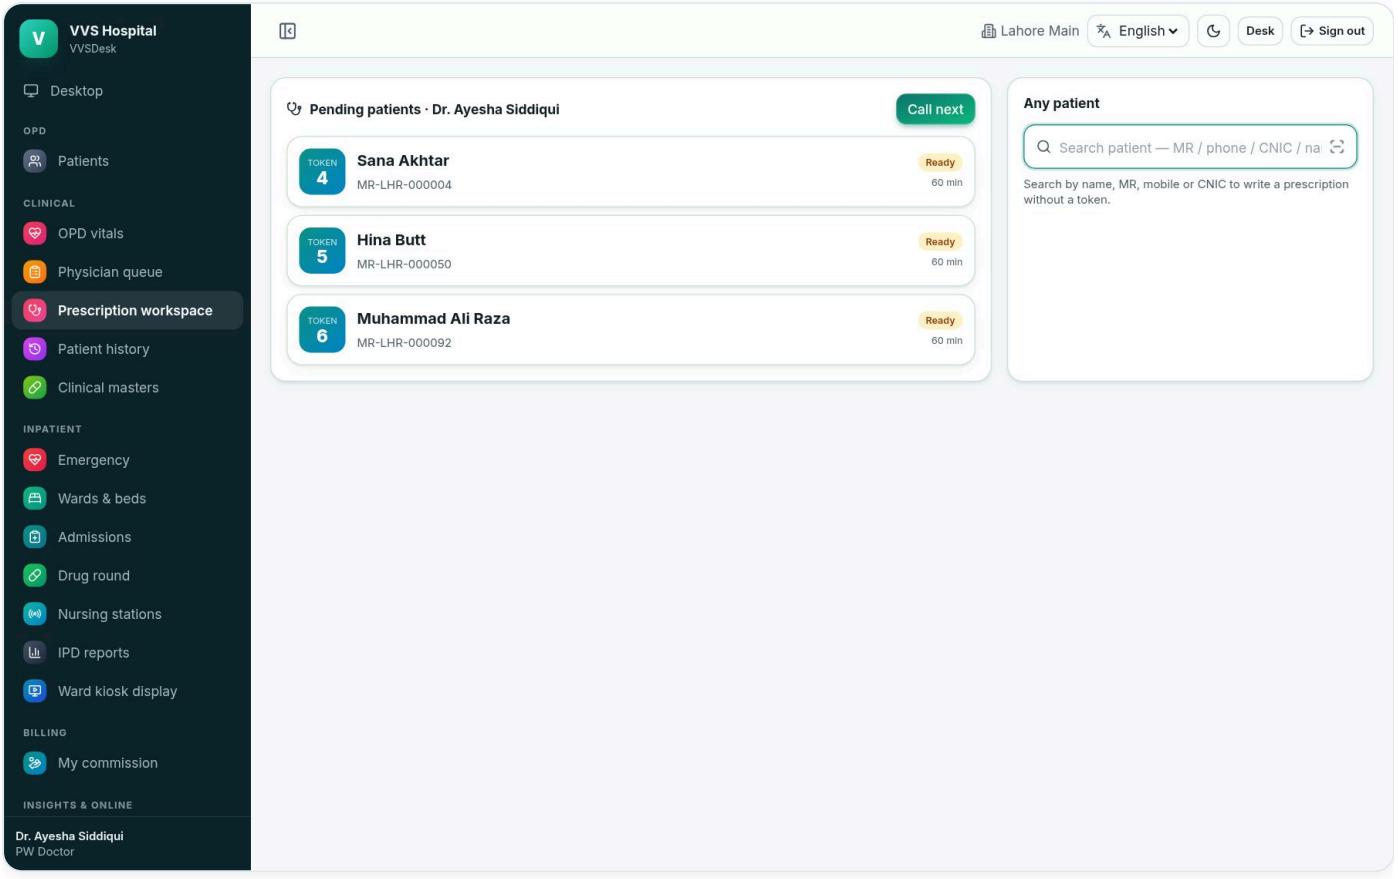

Patient registration with the Urdu name and patient card

3 Nurse vitals and the doctor

1. **OPD vitals**: BP, pulse, temperature, SpO_2, weight, height (BMI worked out) → **Save & send to the doctor**.
2. **Prescription workspace**: the doctor opens the ready patient, adds medicines (alerts as they are added), diagnosis and lab tests, then **Sign & print**.

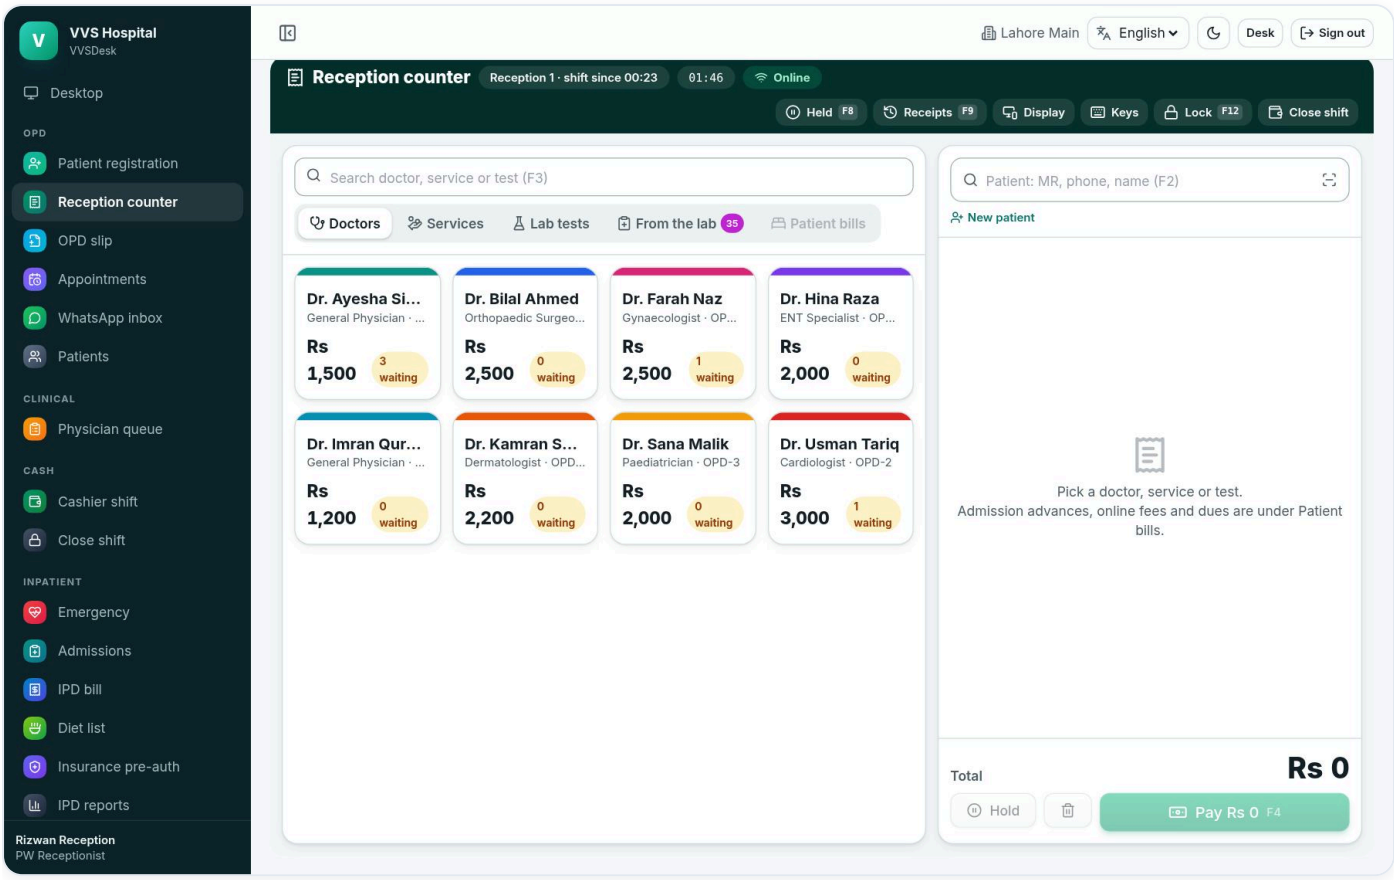

OPD vitals — the nurse's queue

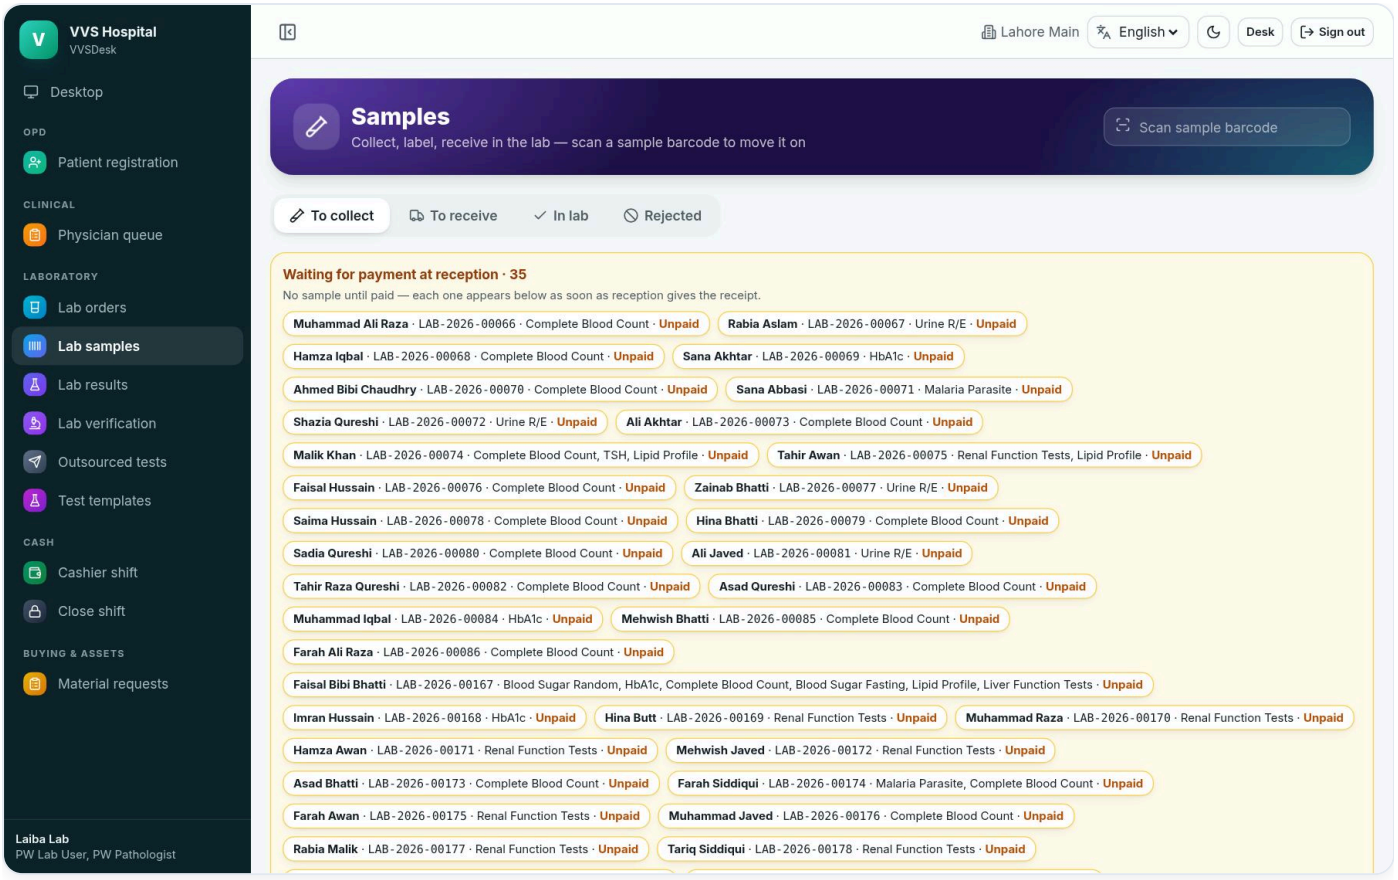

Prescription workspace

4 Laboratory

1. The lab order is paid at the **Reception counter** (one cart with everything the patient owes).
2. **Lab samples**: the order shows **Paid** — **Collect** prints the label, **Receive** in the lab.
3. **Lab results**: values with ranges and flags.
4. **Lab verification**: the pathologist **Verify & sign** — the report prints with a QR code or goes on WhatsApp.

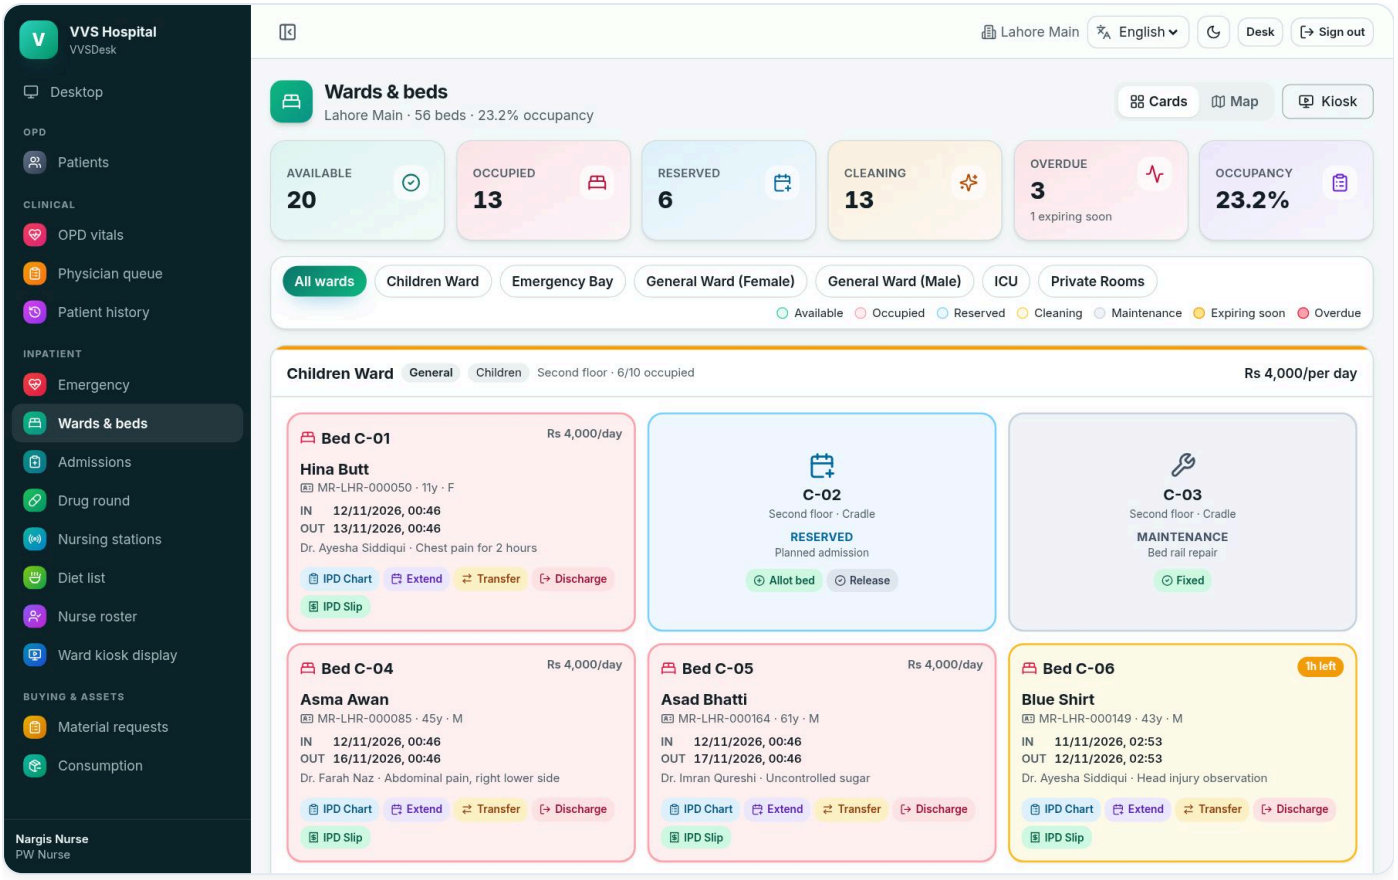

Reception counter

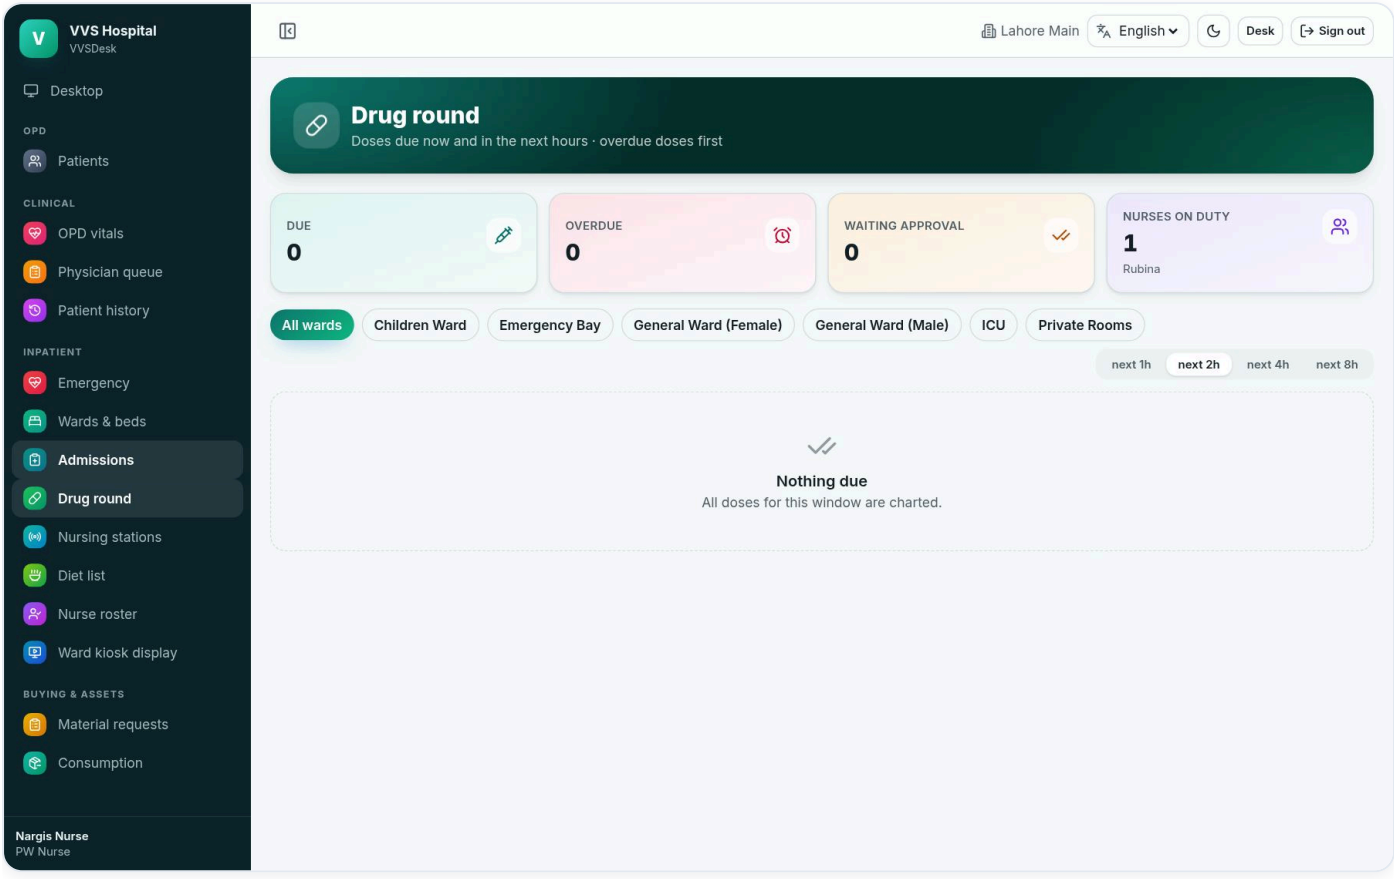

Lab samples — paid orders ready to collect

5 Admission and ward care

1. **Admissions → Admit patient**: bed, doctor, reason, advance.
2. The chart: vitals, notes, ward rounds, medicine orders (the **Drug round**), diet, labs, running bill.

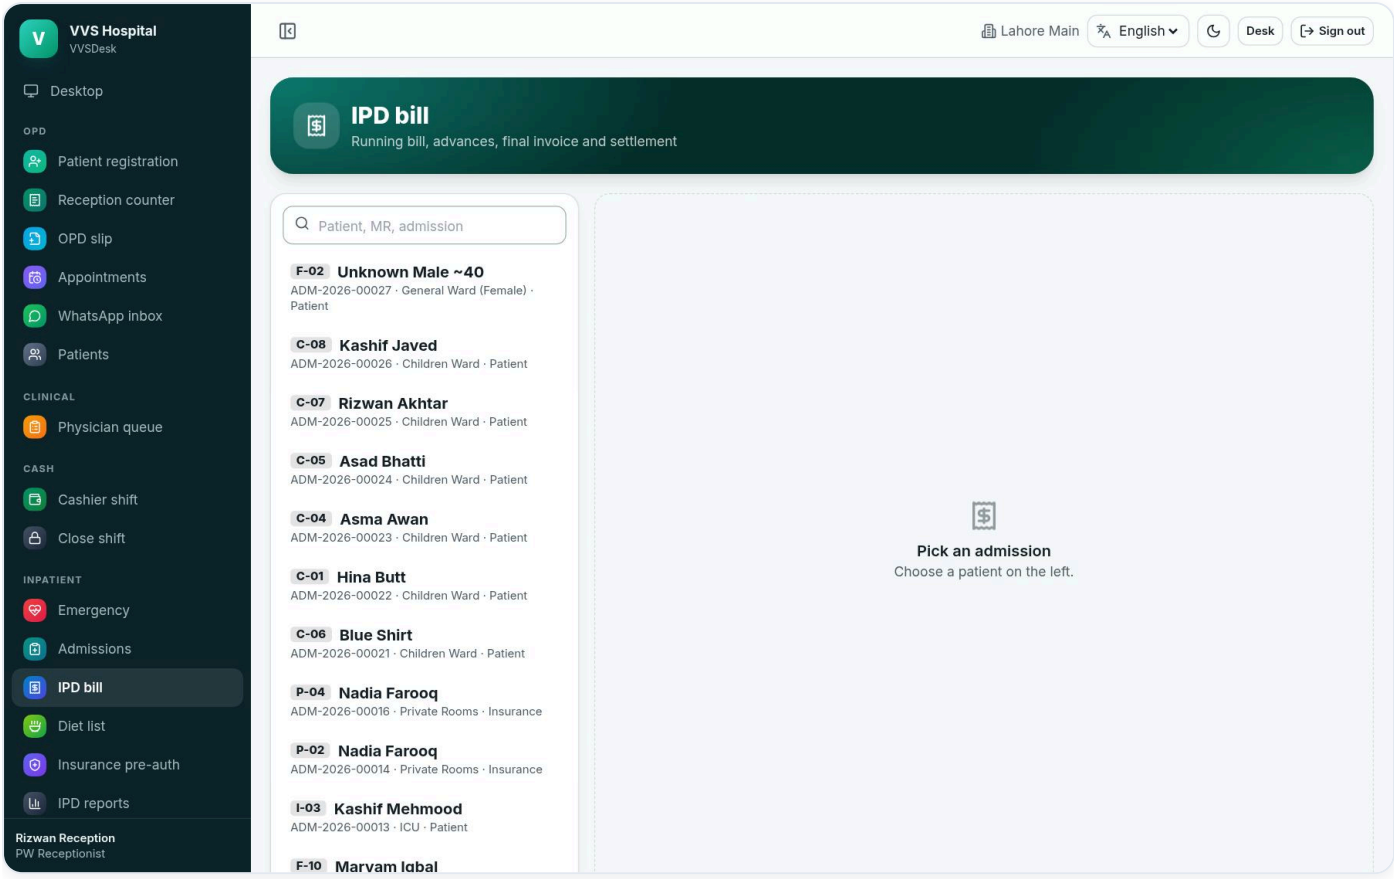

Wards & beds — the live bed map

Drug round

6 Discharge

1. The doctor fills the discharge summary and clicks **Sign summary**.
2. Clearance: summary signed, no lab pending, every due dose charted.
3. **IPD bill** → **Make final bill** → settlement or refund of extra advance.
4. **Complete discharge**: the bed goes to cleaning and the bedside link stops.
