VVS HOSPITAL · HOSPITAL ERP · GUIDE

Process flow & DFD

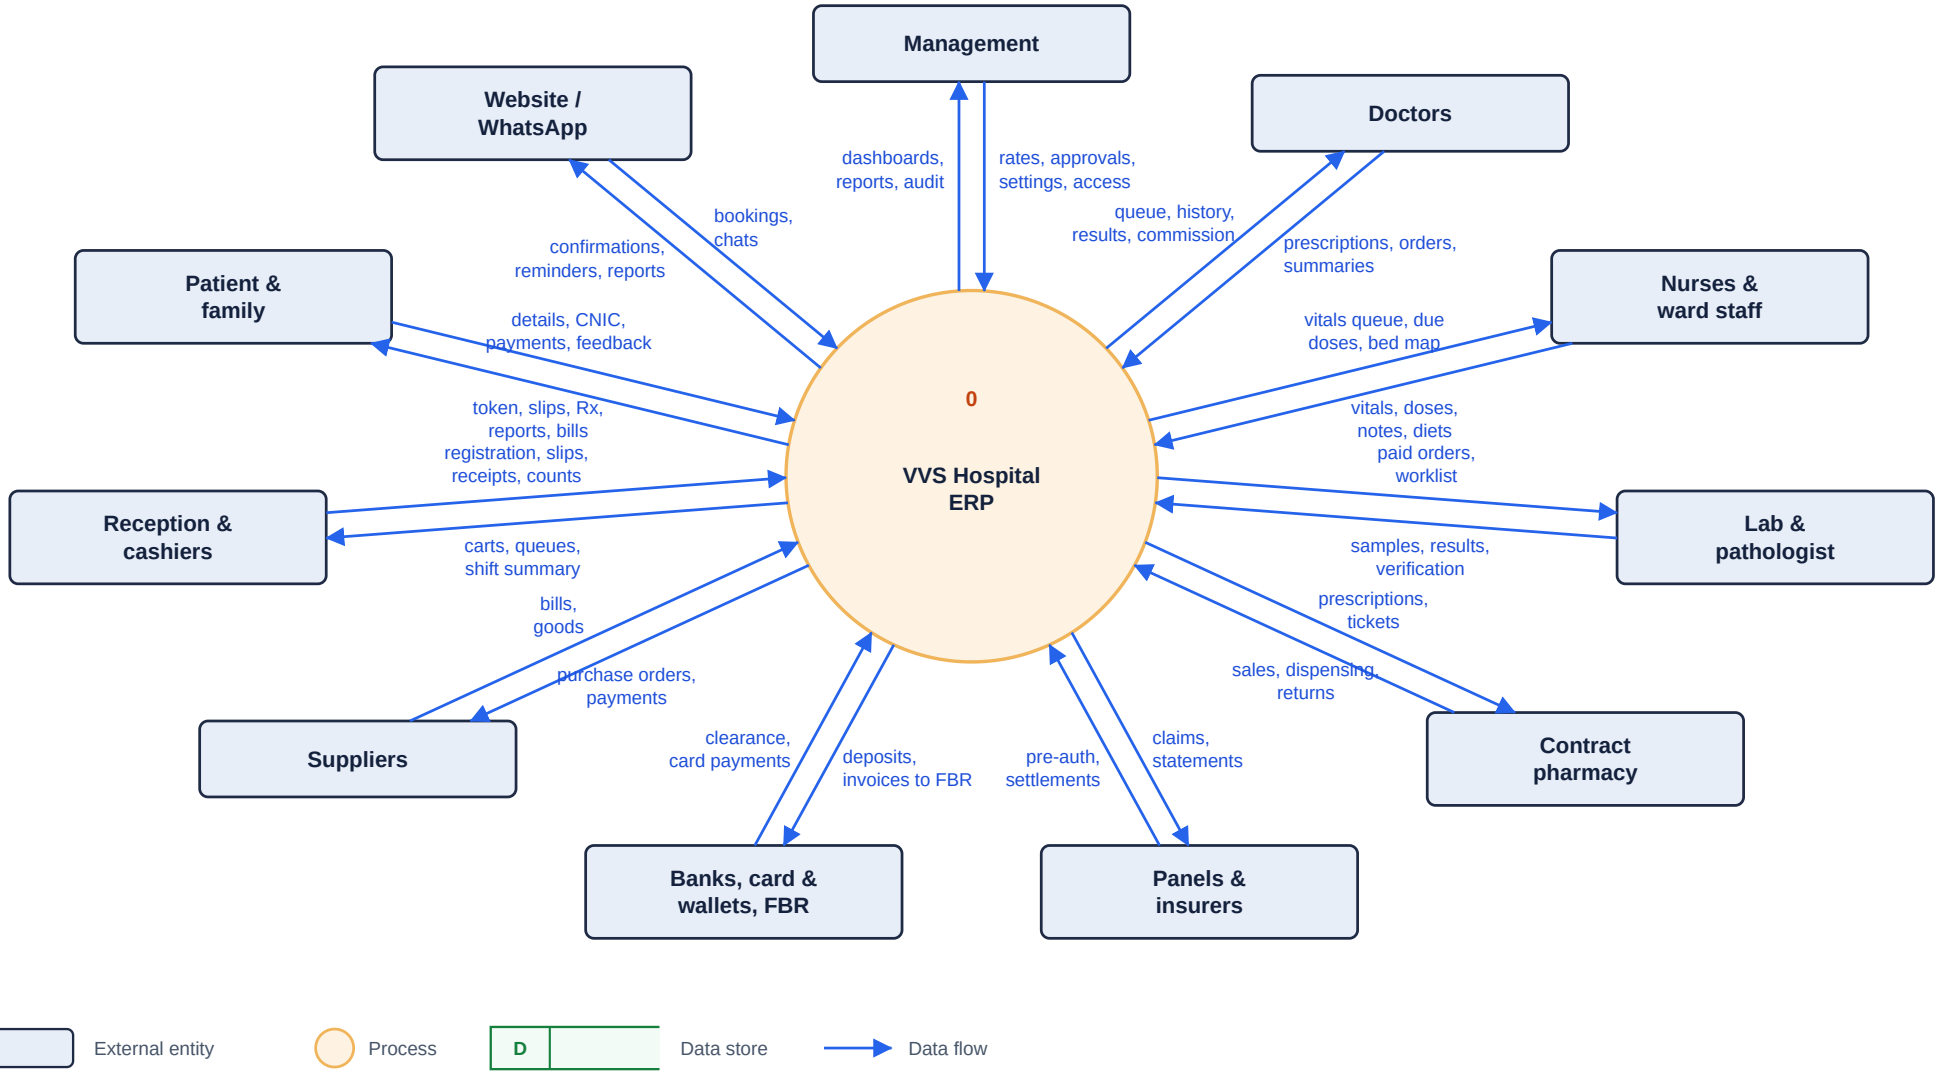

The whole hospital as data flow diagrams (level 0 and level 1), the patient journey as a process flow, and a level 1 diagram for every area: OPD, laboratory, wards and emergency, pharmacy and store, cash and finance.

Circles are processes, light-blue boxes are people or systems outside the ERP, green open boxes are data stores (D1–D5), arrows are data flows.

1. DFD level 0 — VVS Hospital ERP (context)
2. DFD level 1 — VVS Hospital ERP
3. Process flow — the patient journey
4. DFD level 1 — OPD
5. DFD level 1 — laboratory
6. DFD level 1 — wards & emergency
7. DFD level 1 — pharmacy & store
8. DFD level 1 — cash & finance

DFD level 0 — VVS Hospital ERP (context)

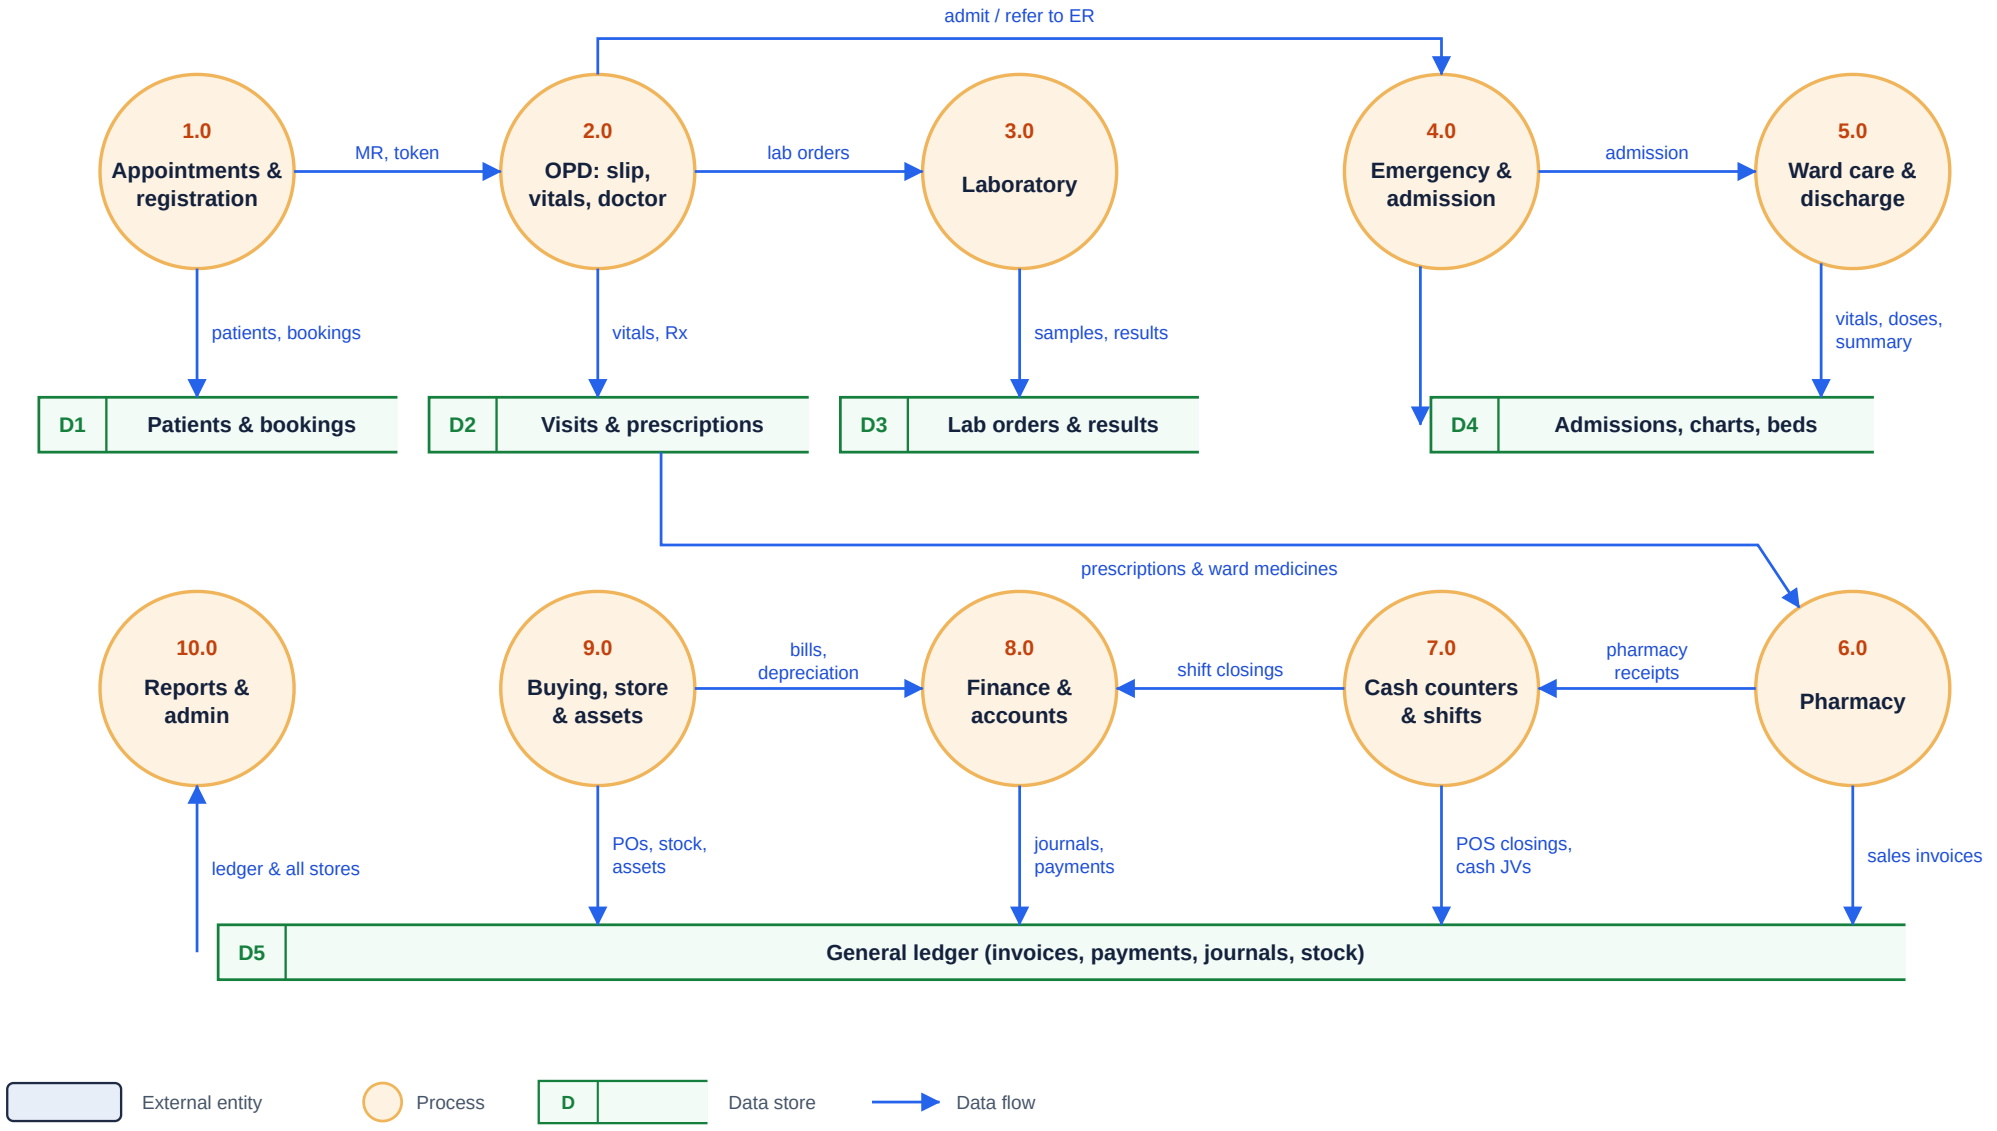

Everyone outside the system and what passes between them

1 · DFD level 0 — the whole hospital in context: patients and families, online booking, doctors, nurses, front desk, lab, pharmacy, payers, suppliers, banks and FBR, management.

DFD level 1 — VVS Hospital ERP

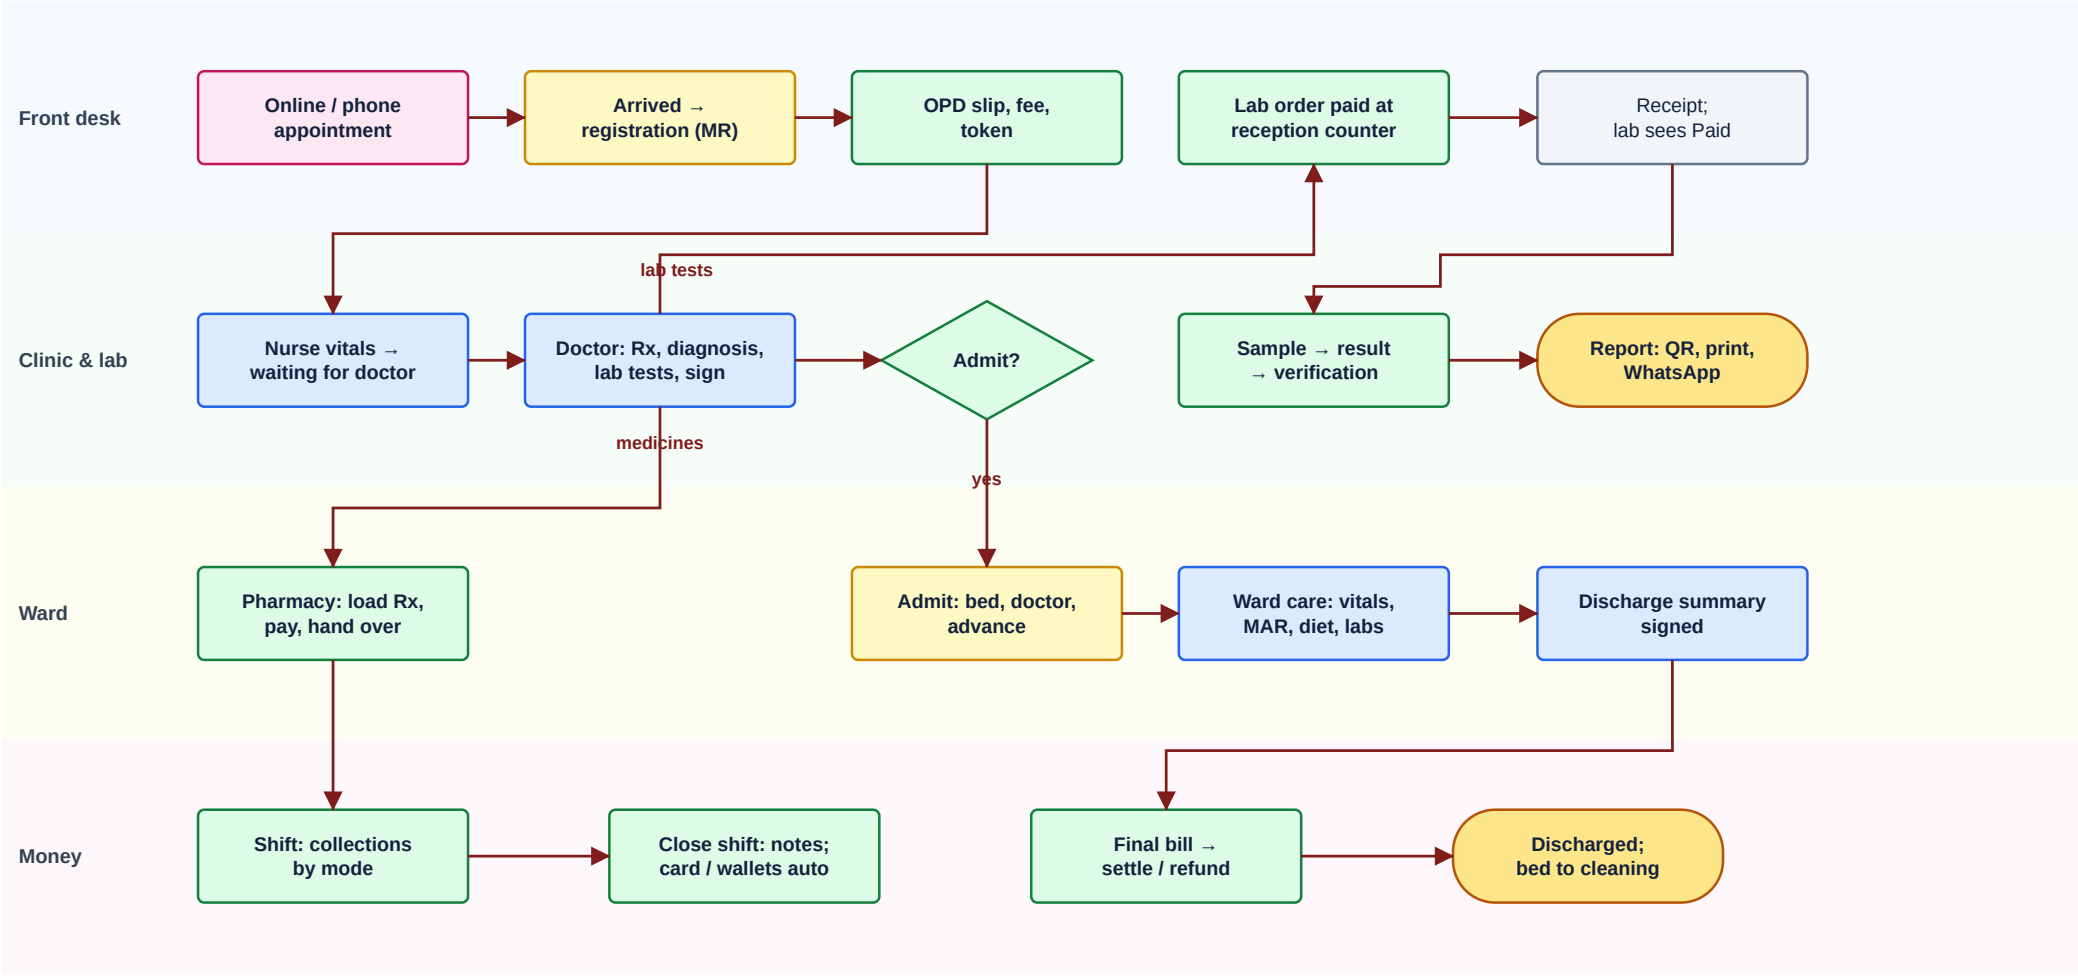

1–5 the patient's path · 6–10 pharmacy, money, buying and reports

2 · DFD level 1 — the whole hospital: appointments → OPD → lab → emergency and admission → ward care and discharge, then pharmacy, cash counters, finance, buying and reports.

Process flow — the patient journey

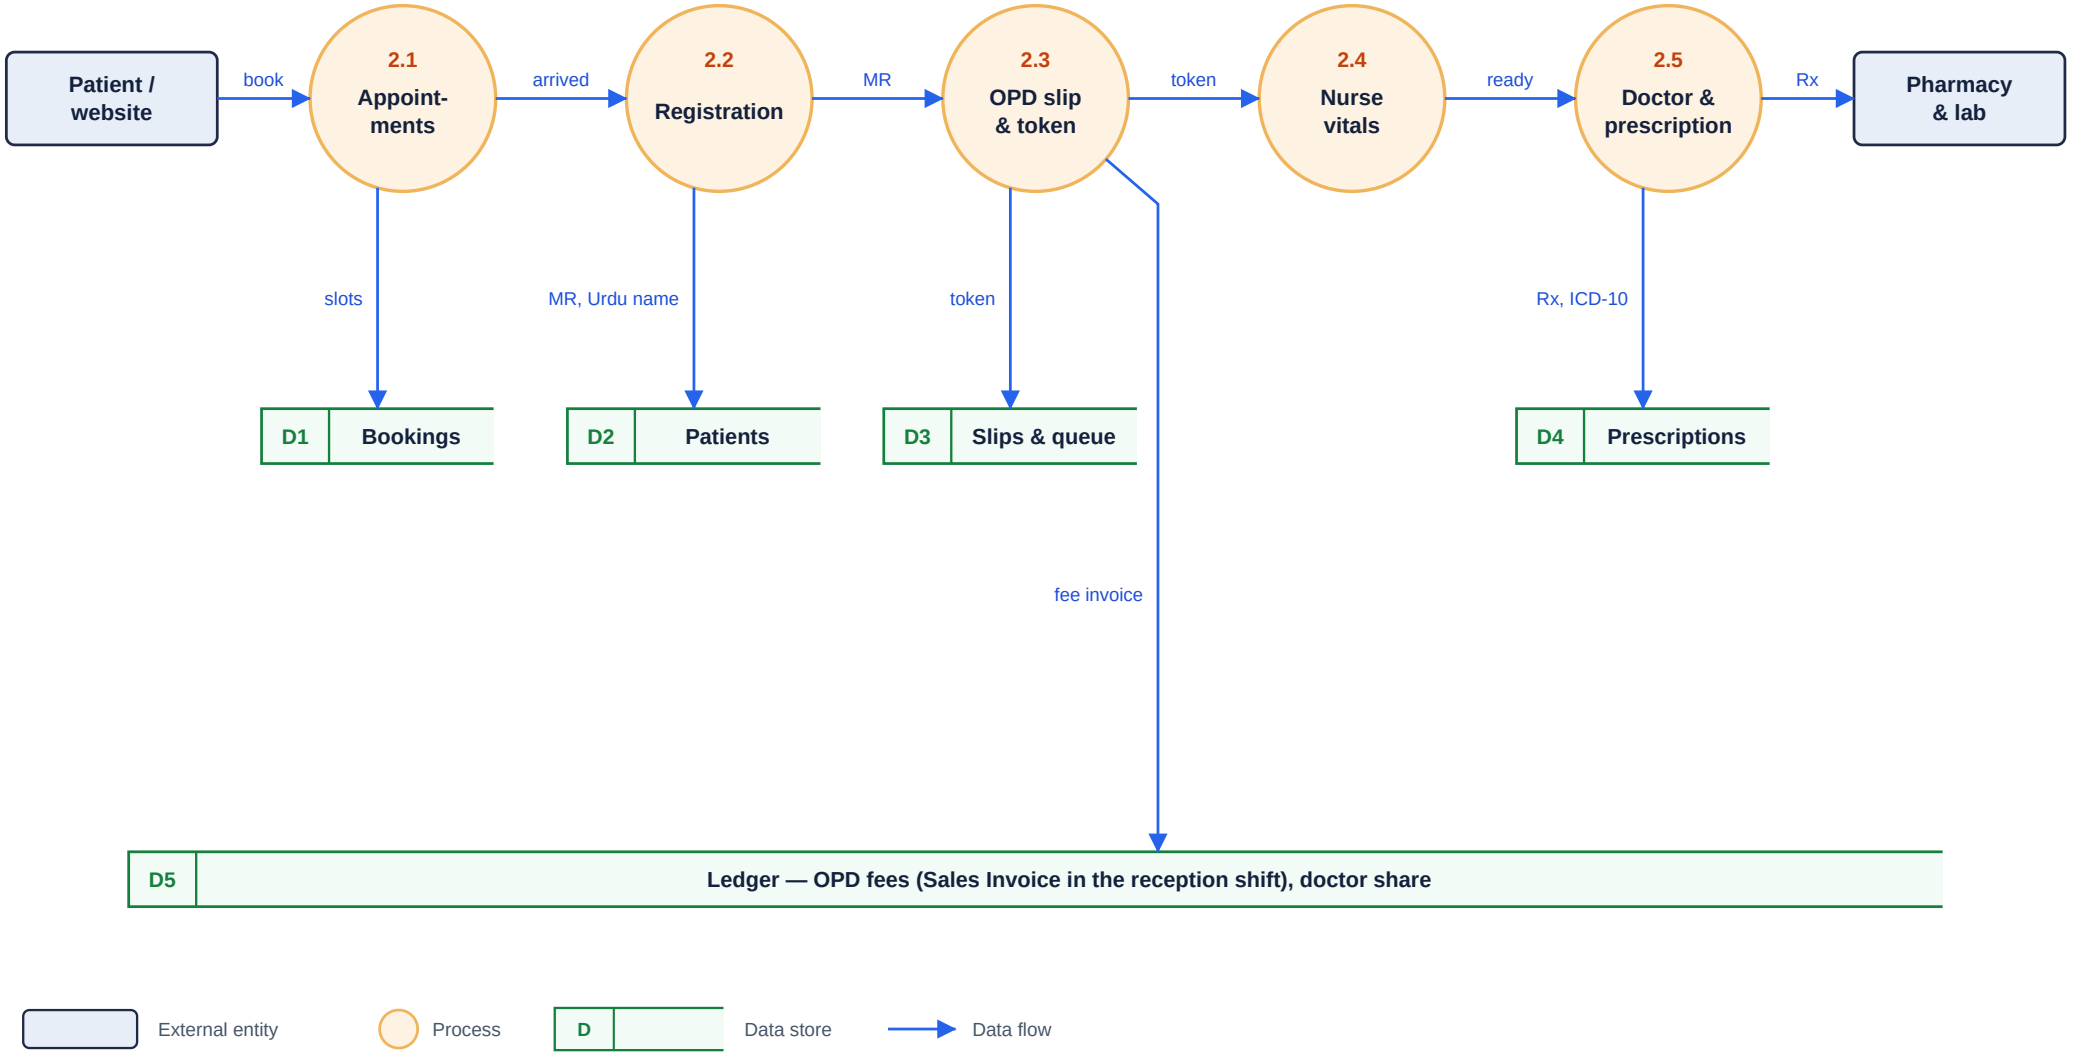

From an online booking to the report, the pharmacy and discharge

3 · Process flow — the patient journey: appointment, registration, OPD slip, nurse vitals, doctor, lab paid at reception, sample to report, pharmacy, admission, ward care, discharge and the money.

DFD level 1 — OPD

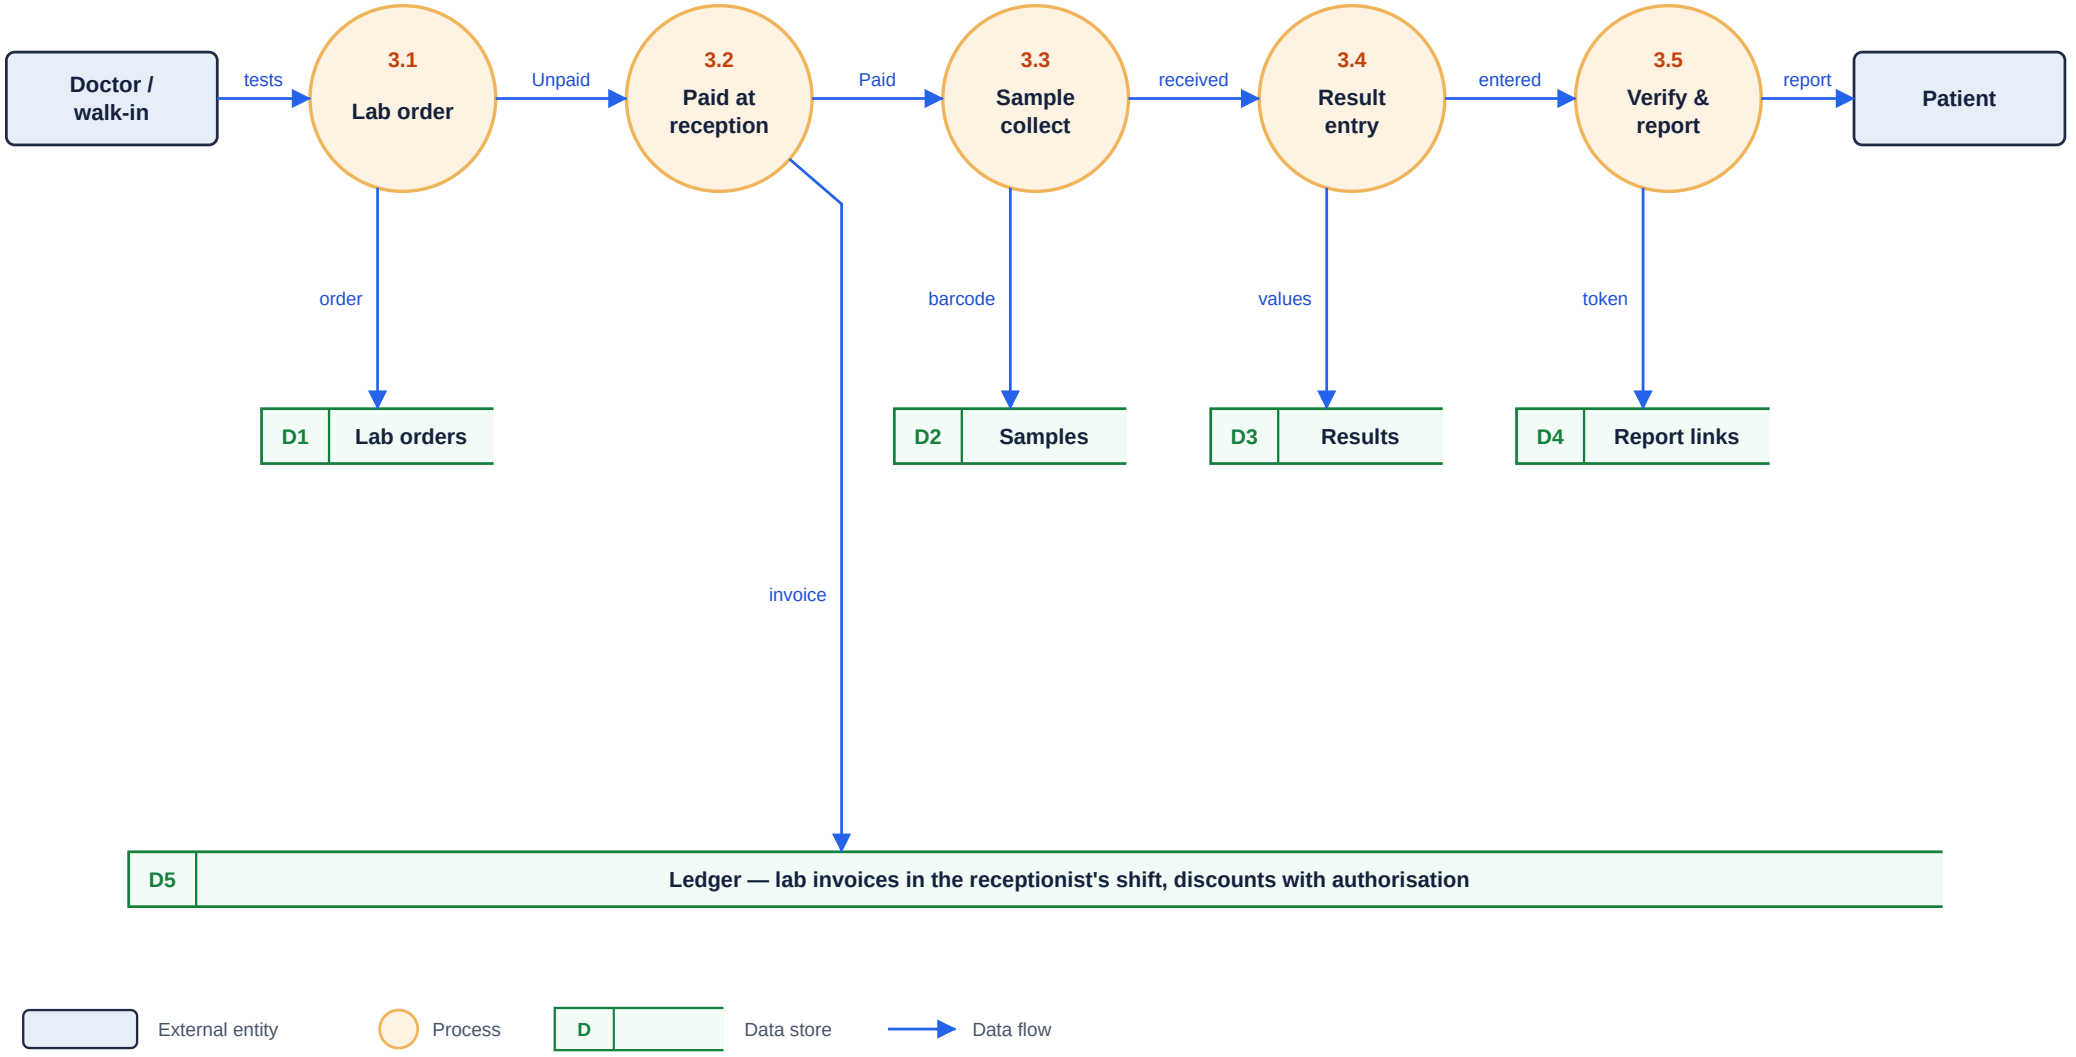

Booking → registration → slip & token → nurse → doctor

4 · DFD level 1 — OPD: appointments (counter, web, WhatsApp), registration with duplicate check, the OPD slip and token, nurse vitals, the doctor's prescription.

DFD level 1 — laboratory

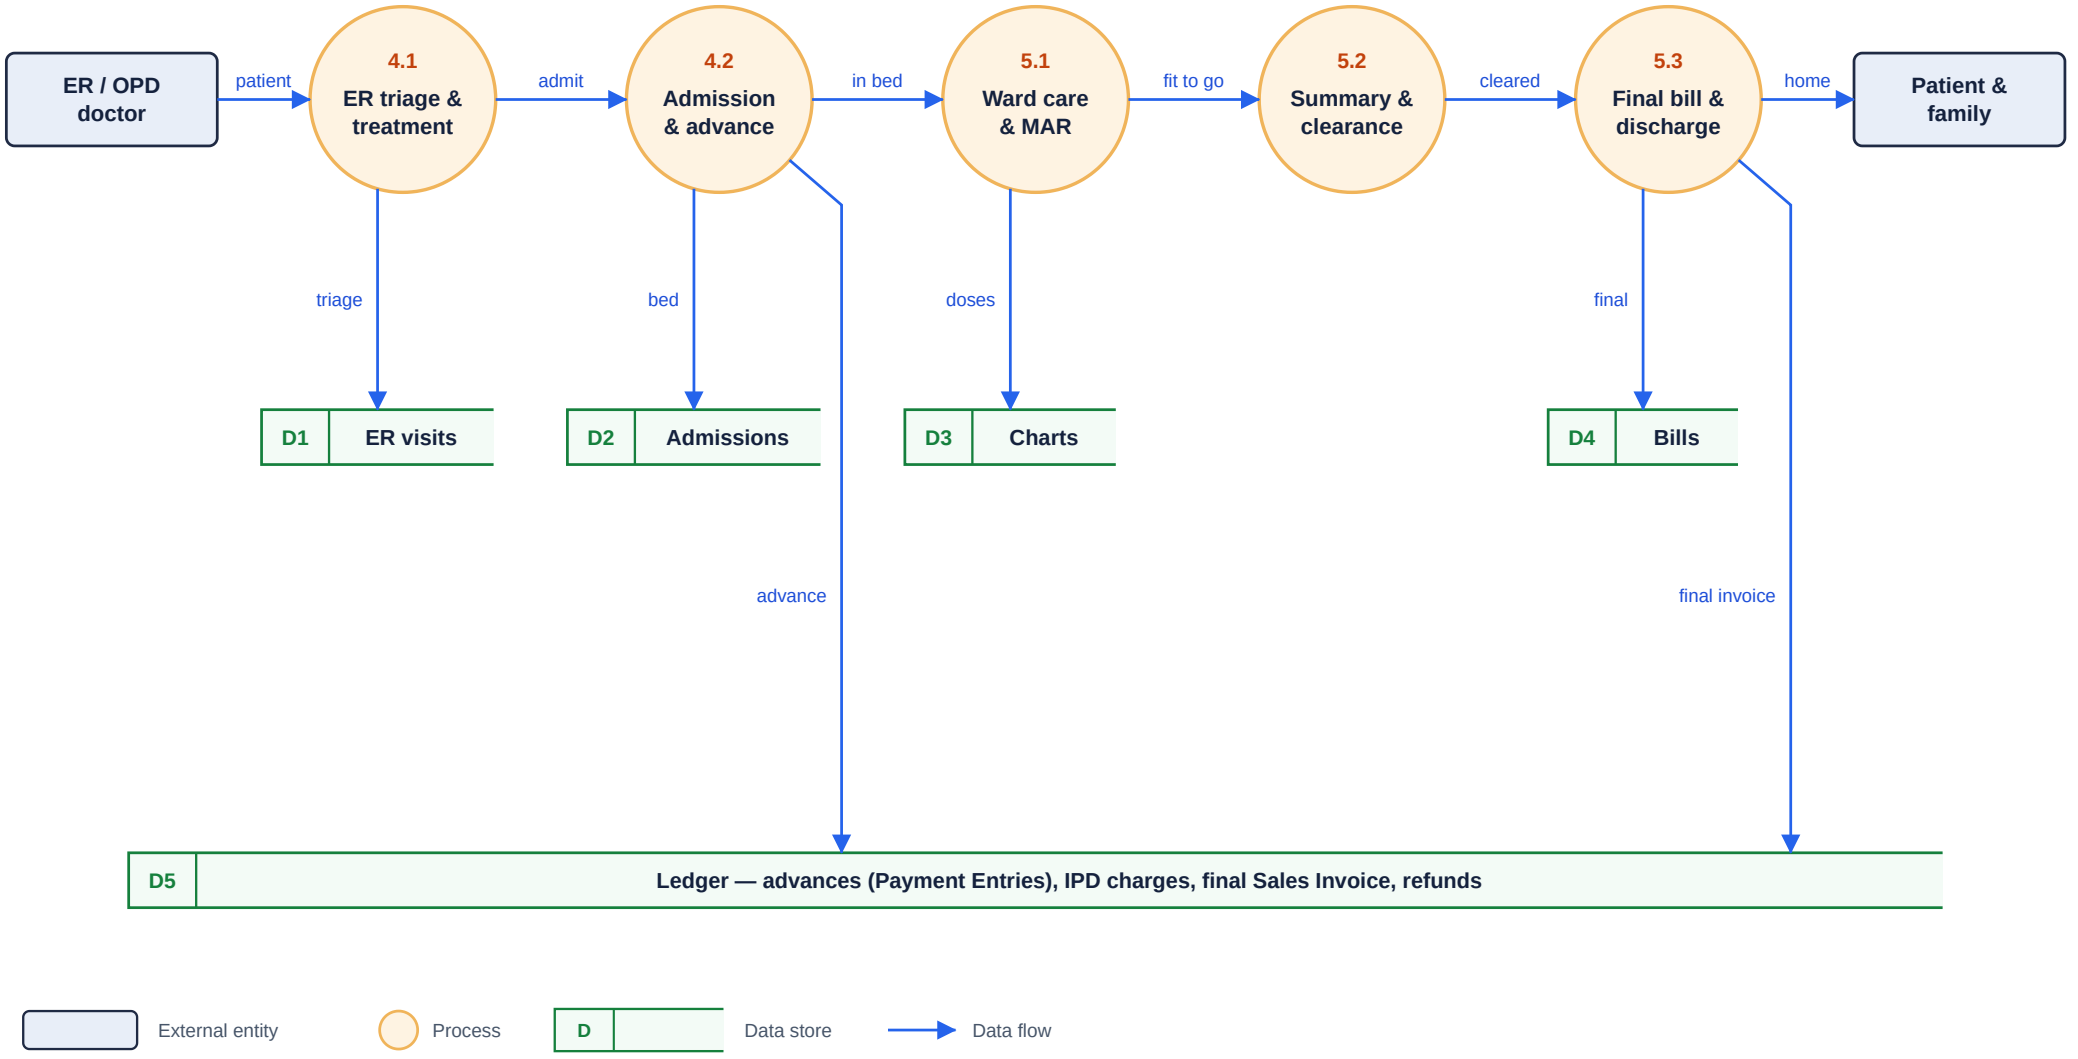

Order → paid at reception → sample → result → verification → report

5 · DFD level 1 — laboratory: orders from the doctor or a walk-in, payment at the reception counter, samples, results with ranges and flags, the pathologist's verification and the report.

DFD level 1 — wards & emergency

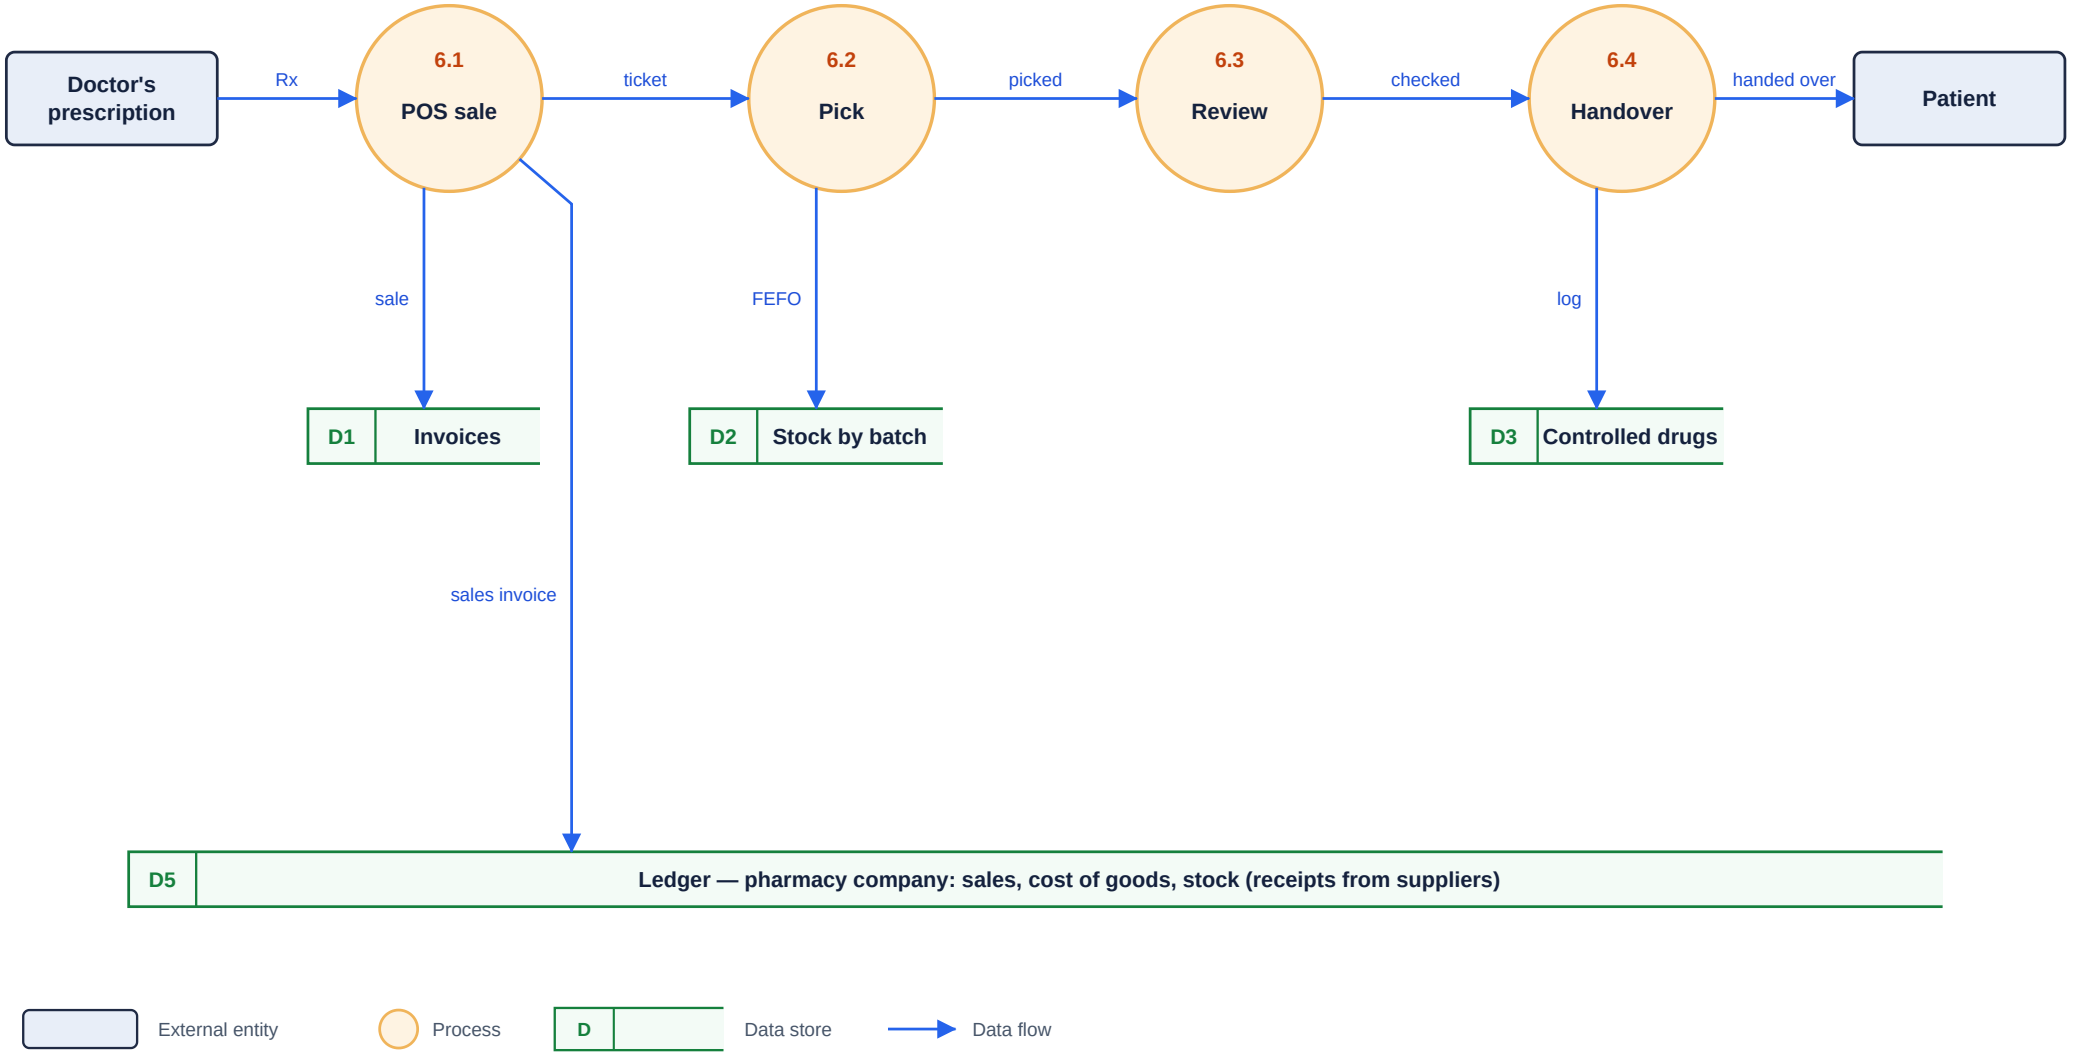

Arrival → triage → admission → ward care → final bill → discharge

6 · DFD level 1 — wards & emergency: ER arrival and triage, admission with an advance, ward care (vitals, MAR, diet, labs, procedures), the discharge summary, the final bill and discharge.

DFD level 1 — pharmacy & store

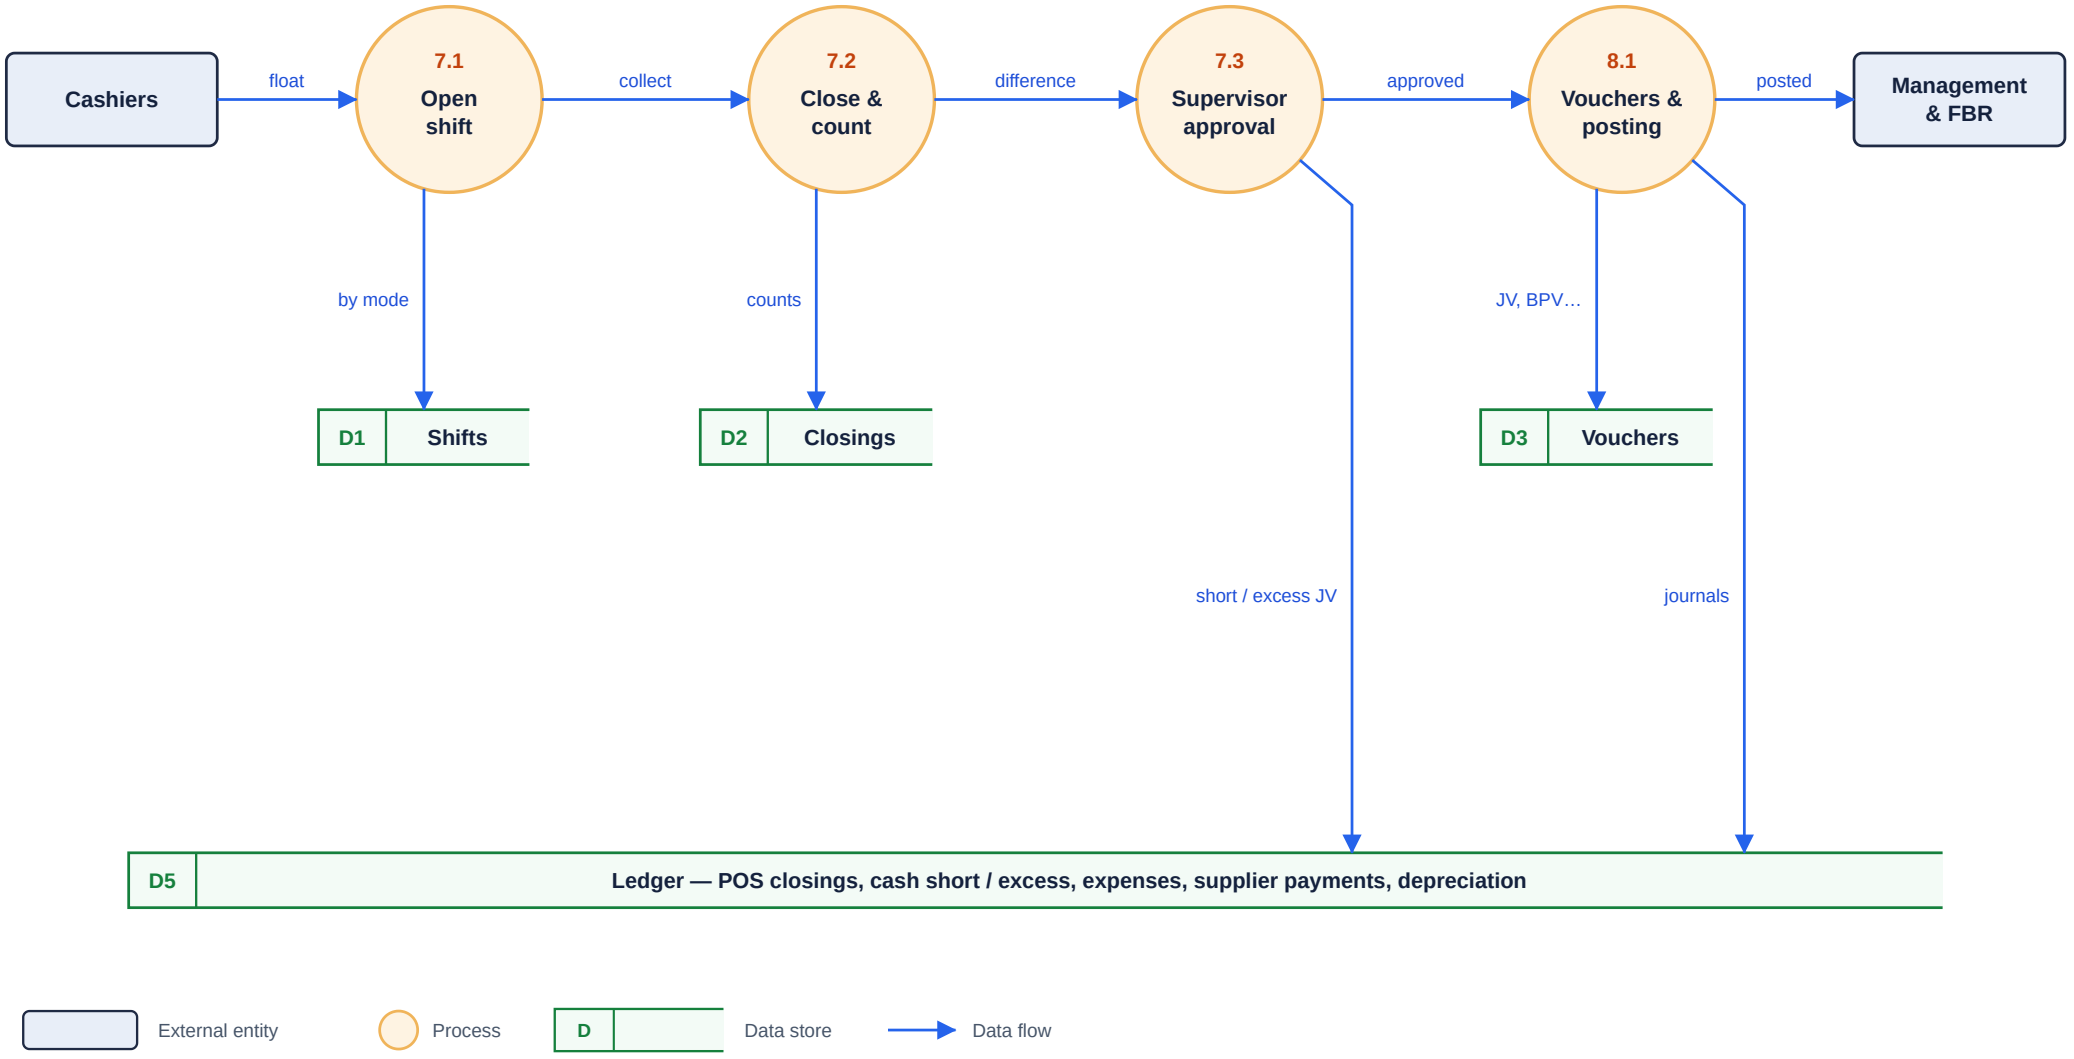

Prescription → POS → pick → review → handover; stock in and out

7 · DFD level 1 — pharmacy and store: the POS (prescription, walk-in, credit), the pick → review → handover pipeline, receiving, transfers, cycle counts and returns.

DFD level 1 — cash & finance

Shift → collections → close → approval → ledger → reports

8 · DFD level 1 — cash and finance: shifts per counter, collections by mode, the close (notes counted, card and wallets from the system), supervisor approval, vouchers posted in batches, finance reports.
